DATE OF LAUNCH (actual or estimated)	DEADLINE FOR TENDERERS (actual or estimated)	Number of LSD vaccine doses to be purchased	DATE of purchase (Actual or estimated)
after 2 weeks	after 3 week	494000	depending from tender
nov-16	finished	500 000	July (** 500.000 to be delivered in July, signed contract for delivery of additional 6.4 Mio Doses in case of demand)
10.04.2017.	26.05.2017.	160 000	june 2017
launched at beginning of February 2017	in procedure, n/a deadline	835 000	n/a
December 2016	Tender finalised, vaccine delivered	600 000	April 2017
-	-	-	-
17.05.2017**	17.07.2017	700 000	30.07.2017
02.05.2017.	01.06.2017.	200000 (+ optional 200%)	30 days after signing the contract
22.05.2017	07.06.2017	310000	05.07.2017

PROGRESS OF THE 2017 LSD VACCINATION CAMPAIGN			
DATE of start of LSD vaccination in 2017 (Actual or estimated)	Total number of bovines to be vaccinated	Estimated number of bovines vaccinated so far	Comments
started with available doses	on process	60 000	NA
unknown	unknown	0	vacc. only in case of outbreak
24.04.2017.	340 000	8 145	
01/01/2017			routine vaccination of new born calves more than 4 months and bovine from other MS (trade)
22.04.2017 annual revaccination	686 212	224 189	Due to insufficient number of vaccine doses needed for annual revaccination, the vaccination was planned to be performed in certain risk areas only, as the expected vaccination coverage is 95-99% . Vaccination should be completed as by 30.05.2017. The rest bovine population will be revaccinated by the vaccine doses expected to be purchased
May 2017	480 000	23 870	
-	-	-	-
01.01.2017	700 000	105.000 (2017) as registered in database	**On 17.05.2017 the current tenderer was rejected due to the discrepancies of the economical offer. A reannouncement of tender was made on 19.05.2017 (actual date)
0	0	0	Vaccination will only be performed if an outbreak occurs within 100 km of the Hungarian border. Then a zone vaccination (within 50 km) would be performed.
			No new outbreaks since 2013, vaccination non mandatory since 2016.
