

Djahne Montabord OIE Sub-regional representation for Central Asia

"One Health" policy implementation in Europe

Seventh Meeting of the Regional Core Group (RCG7) of the OIE regional Commission for Europe

Bern, Switzerland - 17 December 2018

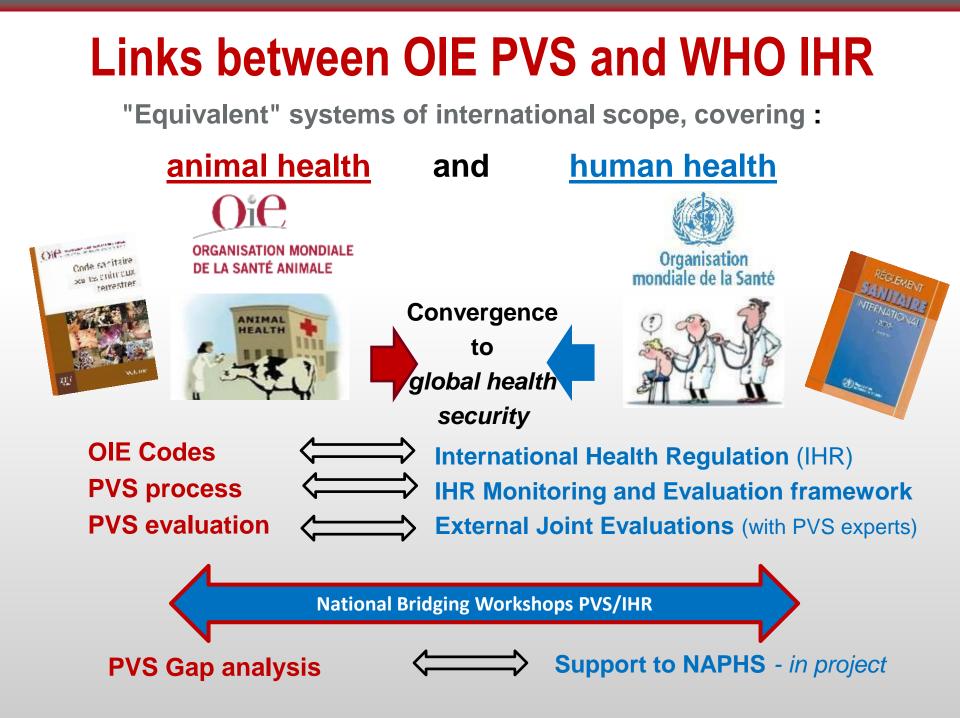

WORLD ORGANISATION FOR ANIMAL HEALTH Protecting animals, preserving our future

National Bridging Workshops

National IHR and PVS Pathway Bridging Workshop

Objectives of the workshop

- Promotion of 'One Health' and strengthening of collaboration
- Sharing of information: Discussion around case studies and sharing of IHR and PVS results
- Diagnosis: Identification of strengths and weaknesses in the intersectoral <u>collaboration</u>
- Strategic planning: road-map of joint activities to implement to improve intersectoral <u>collaboration</u>

Interactive methodology

(material, case study, working groups)

Session 1 : One health concept and national perspectives

One Health'

- Veterinary services / Human services
- Successful interactions / coordination / multidisciplinary strategies

Session 2 - The road to One Health interactions and gaps

Case studies and assessment of the level of collaboration

- o Identification of areas of collaboration and joint activities
- Assessment of levels of collaboration between the 2 sectors for 15 key technical areas
- o Identification of main gaps in the collaboration
- Coordination at high, local, technical levels
- Legislation and regulations
- Finance
- Communication with media, with stakeholders
- Field investigation
- Risk assessment

- Surveillance
- Laboratory
- Response
- Education and training
- Emergency funding
- Human resources

Session 2 - The road to One Health interactions and gaps

Session 3 : Bridges along the road to One Health

♦ IHR

- o IHR
- Monitoring and evaluation framework
- o Annual reporting of capacities and Joint External Evaluations

PVS pathway

- o OIE, roles, mandate
- o PVS : steps, purpose and scope, process and outputs

IHR-PVS bridging

- o Present how OIE and WHO tools can be bridged
- o Presentation of the IHR-PVS matrix

Purpose of the International Health Regulation

	JEE (WHO)	PVS evaluation (OIE)											
Full name	Joint External Evaluation	Performance of Veterinary Services Evaluation											
Framework	The JEE is one of the 4 components of the IHR Monitoring and Evaluation Framework	The PVS Evaluation is the first step of the PVS Pathway											
Objective	Assesses the capacities of the country to respond to public health threats and their compliance with IHR	Assesses the capacities of Veterinary Services and their compliance with OIE standards											
Obligation	Voluntary process (request made by country)												
Assessors	External experts + N	National counterparts											
Format	Self-assessment + 5-day mission (1-day site visits) of external experts	2-3-week mission (many site visits) of external experts											
Indicators	49 indicators (in 19 technical areas)	47 indicators named Critical Competencies (in 4 components)											
Scoring	Each indicator is scored on a 1-5 scale												
Gaps identified	For each indicator												
Recommendations	For each	indicator											
Confidentiality	Report is made public	To be decided by the country											
Follow-up	Outcomes to feed into National Action Plan for Health Security	Outcomes to feed into PVS Gap Analysis											

IHR-PVS matrix

Session 3 : Bridges along the road to One Health

Understanding that tools are available to explore operational capacities of the sectors

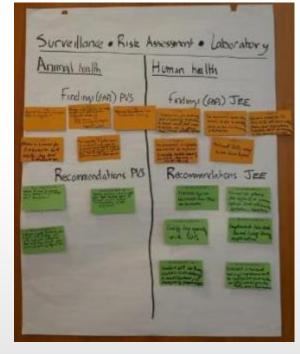

Understanding the inter-contribution of each sectors

- Understand that most gaps are not disease specific but systemic
- Identify technical areas to focus on during next sessions

Session 4 : Extraction of assessment results

Recommendation ----

From JEE or IHR annual reporting and PVS evaluations, extraction of relevant sections and identification of what can be synergized and improved jointly

- Understanding of the assessment reports
- Extract main gaps to each technical area
- Extract main recommendations from existing reports
- Start to understand the efforts needed

Session 5 / 6 : Joint road planning

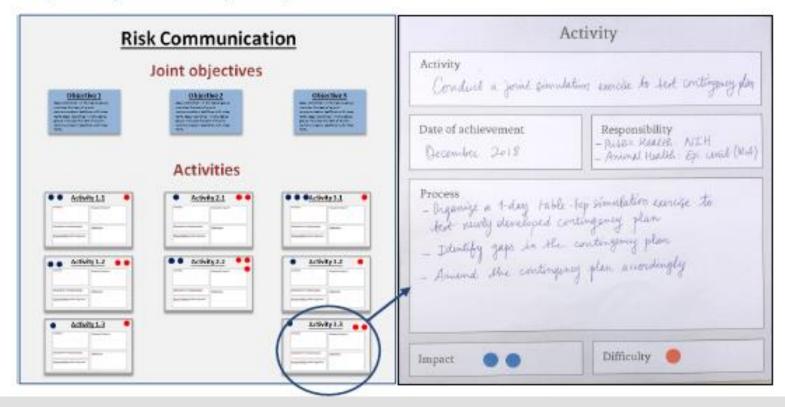

Develop a realistic and achievable road-map to improve the collaboration between the sectors

- Identification of joint activities to strengthen inter-sectoral collaboration and improve performance for the thematic area
- Objectives associated with the activities
- Evaluation of costs of implementation and level of impact of the implementation of each activity

Session 5 / 6 : Joint road planning

Example of expected result (overall)

Identification of clear and achievable activities to improve inter-sectoral collaboration

Session 5 / 6 : Joint road planning

World café

Prioritization vote

Session 7 : Way forward

Drawing the way forward by:

- o Identifying the next steps
- Plan the developped road-map into other plans, such as NAP for health security

Linkage with NAP for Health Security

- Identification of immediate and practical next steps
- Identification of opportunities for other components of the IHR-Monitoring and Evaluation Framework (MEF)

Zoonoses meeting

ARM, AZE, GEO, KAZ, KGZ, RUS, TJK, TKM, UZB

Zoonoses meeting Actions for Member States

- Strengthen political commitment through high level advocacy to accelerate prevention and control of zoonosis
- Foster intersectoral collaboration (encouraged to conduct national bridging workshops)
- Develop and/or update national guidance and regulations in accordance with OIE/WHO normative guidance

Zoonoses meeting Actions for Member States

Priorities

- ✓ in terms of morbidity, social and economic impact, identify and characterize zoonoses of public health importance with the aim to update prioritization
- develop joint (human/animal) strategy and action plan on priority zoonoses, using the One Health approach
- in collaboration with OIE/WHO, identify operational research priorities on epidemiological situation, prevention and control of zoonoses

Regularly share data with OIE/WHO on zoonosis and experiences in surveillance and control of zoonoses

Zoonoses meeting Actions for OIE/WHO

Cross sectoral collaboration

- ✓ provide technical support and guidance and continue to facilitate cross sectoral collaboration among public health and animal health sectors at national and regional levels
- ✓ support national bridging workshops in countries
- document countries experiences to promote and facilitate sharing best practices across countries

Disseminate existing normative guidance on clinical management, surveillance and control of zoonoses

Zoonoses meeting Actions for OIE/WHO

Support countries

- ✓ in strengthening of capacity on epidemiology/epizootiology
- support mobilization of resources to accelerate prevention and control of zoonosis
- Continue facilitating and supporting this initiative and promote an intersectoral cooperation through different activities at national/subregional/regional levels

Thank you for your attention
