# BIOSECURITY

- draft proposal for farm categories -

---

The sanitary veterinary norm regarding the biosecurity conditions in swine holdings, approved by the NSVFSA and Ministry of Agriculture and Rural Development Order no. 20/195/2018 **is revised**, such as:

## **LEVEL I – minimum biosecurity measures**

- Backyard holdings: max 5 fattening pigs, for own consumption

## **LEVEL II**

- Type "A" commercial farms 6-128 pigs for (1) fattening or (2) reproduction (plus shower)

## **LEVEL III**

- Commercial holdings

**Bazna and Mangalița – traditional outdoor breeds** – double fenced enclosures (one of them electric) + biosecurity

# Changes in Backyard biosecurity

---

Non-commercial holdings with max. 5 fattening pigs, for own consumption. No reproduction.

Mandatory: personal hygiene of farmers, changing clothes, footwear.

Forbidden the use of fresh grass or cereals. Only after 30 days.

After adoption, **awareness campaigns** for backyard owners through local councils, private vets, county representatives of the Minister of Agriculture and Rural Development, and other institutions.

**Transition period:** 6 months. Holdings with more than 5 pigs will slaughter or comply with the new biosecurity rules.

## **Other amendments of legislation:**

prohibiting the movement of pigs from non-commercial farms to other non-commercial farms or slaughterhouses.

prohibiting the raising of pigs in non-registered extravilan farms.

# Hunting quota – amendments

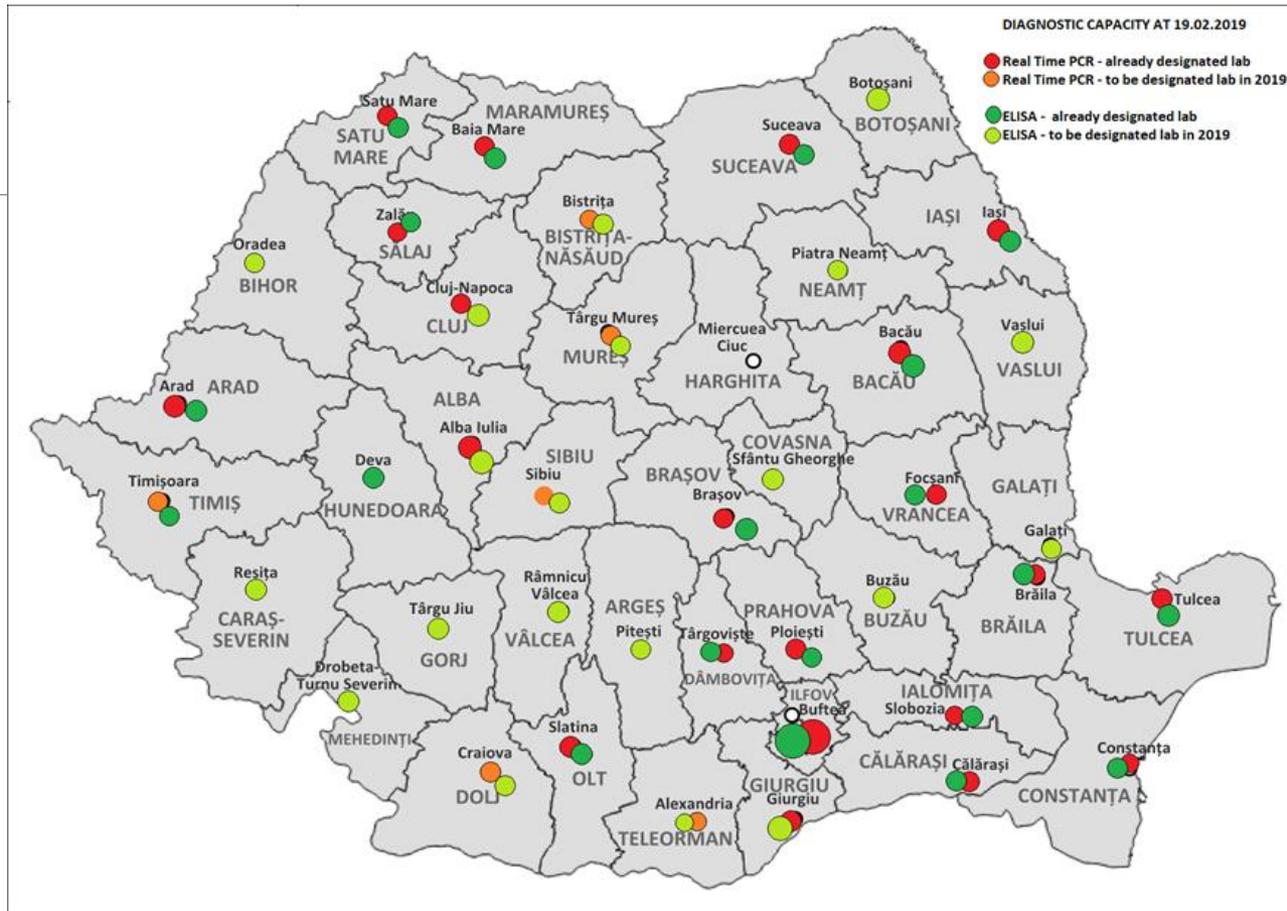

---

Due to the evolution of ASF in wild boars, the hunting strategy for **hunting season 2018-2019** was modified, such as:

Hunting quota was supplemented by an intervention quota;

The hunting season for female wild boar and piglets was prolonged until 14.05.2019.

# Laboratory capacity

	Real Time PCR	ELISA
Now (febr 2019)	IDAH + 20 labs	IDAH + 19 labs
In 2019	+ 6 labs	+ 20 labs

---
