in South East Europe  
under the GF-TADs umbrella

## **SGE LSD9**

Athens, 16-17 October 2019

# **Report for Croatia**

# Lumpy Skin Disease occurrence in 2019

LSD outbreaks reported in 2019 <i>(From 01/01/2019 until --/--/2019)</i>			
Region	Number of outbreaks	Period of occurrence	
		From <i>(date of 1st outbreak)</i>	To <i>(date of latest outbreak)</i>
No outbreak			

# Lumpy Skin Disease Vaccination in 2019

*Vaccination has been ceased from 2018*

# Lumpy Skin Disease surveillance in 2019

## **Type of surveillance implemented**

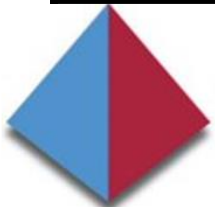

*(i.e. active , passive , clinical /serological / virological, please provide short description)*

- *Surveillance is implemented for the purpose of freedom maintenance and early detection of LSD infection*
- *Passive and active surveillance is implemented*
- *Passive surveillance – based on clinical suspicion: virological (serological) testing of suspect animal*
- *Active surveillance – monthly (June – October) clinical examinations in risk area – on each holding - up to 3 bovine animals on each holding - 150 bovine animals in total*
- *Risk area assessed according to available epidemiological data:*
  - *Municipality Konavle – Dubrovnik-Neretva county*
- *Active surveillance – serological testing of 1000 randomly selected nonvaccinated bovine animals at the end of at risk period – ongoing*
  - *Freedom maintenance*

## Lumpy Skin Disease surveillance in 2019

	Number examined	Outcome
Number of <u>LSD suspicions</u> investigated	1	Neg
Number of <u>holdings</u> subject to LSD clinical examination	25	
Number of <u>animals</u> subject to LSD clinical examination	150	
Number of Samples subject to LSD serology (e.g. ELISA , SNT other)	1000	On-going
Number of Samples subject to LSD virological tests (e.g. PCR, other)	1	Neg
Comments – other info (if any)	One suspect bovine animal in consignment sent for direct slaughter from Hungary	

# Lumpy Skin Disease planning for 2020

*(e.g. LSD vaccination/surveillance, if any)*

*Vaccination not planned  
Surveillance similar as in 2019*
