

# Lithuania

## ASF epidemiological situation, surveillance and awareness campaign

State Food and Veterinary Service  
GF-TADs, Prague, 12-13/03/2019

# ASF in wild boars 2018-2019

1446 cases  
3096 positive  
(444 hunted and 2654 found dead)

110 cases  
166 positive  
(74 hunted and 92 found dead)

# ASF strategy in wild boars

## Wild boar management: long term

- Hunting all year round,
- Official control,
- Selective hunting of adult females,
- Total ban of feeding,
- Active search and destruction of dead wild boars
- Passive and active monitoring,
- Biosecurity in hunting clubs,
- Compensation for dead wild boar destruction and adult female hunting
- Awareness

# Awareness campaign

- Leaflets/instructions for:
  - Hunters;
  - Farmers;
- Internet, TV, radio, newspapers;
- Municipalities/parishes are involved;
- During inspections, official vets hand out ASF leaflets for farmers;
- Farmers are informed by SMS on new ASF cases and obligation to declare pigs.

# ASF information for drivers

## Main stopping places for drivers

100 places with info on risks of ASF virus spread with food waste.

**DĖMESIO!**  
**NEPLATINKITE AFRIKINIO KIAULIŲ MARO VIRUSO!**

- Nepalikite maisto atliekų poilsio aikštelėse.
- Maisto likučius būtina išmesti į uždariusius šiukšlių konteinerius.

Maisto produktuose gali būti afrikinio kiaulių maro virusas. Tai žmonėms nepavojinga, tačiau kiaulėms ir šernams mirtina infekcinė liga.  
Daugiau informacijos [www.vsmv.lt](http://www.vsmv.lt), nemokamu tel. 8 800 40 403

**ATTENTION!**  
**BE CAREFUL NOT TO SPREAD THE VIRUS OF AFRICAN SWINE FEVER!**

- Do not leave any food waste in the rest area.
- Food waste must be discarded into closed waste containers.

The virus of African swine fever may be present in food. This is not hazardous for humans but for pigs and wild boars this is a deadly infectious disease.  
For more details please see [www.vsmv.lt](http://www.vsmv.lt) or call the phone +370 800 40 403

**ВНИМАНИЕ!**  
**НЕ РАСПРОСТРАНЯЙТЕ ВИРУС АФРИКАНСКОЙ ЧУМЫ СВИНЕЙ!**

- Не оставляйте пищевые отходы на площадках отдыха.
- Остатки пищи обязательно выбросьте в закрытые мусорные контейнеры.

Вирус африканской чумы свиней может быть найден в пищевых продуктах. Вирус не вызывает никакой опасности для людей, но это смертельно опасная инфекционная болезнь для свиней и диких кабанов.
