

PVS Pathway Orientation Training Workshop for Eurasian countries

8-11 October 2019, Nur-Sultan, Kazakhstan

PVS Pathway Success

- A great success – nearly 141 countries & 422 missions from 2007 to 2018
- Almost complete global uptake
- OIE's flagship global programme

The workshop in Nur-Sultan was organised under the Agreement between Kazakh Scientific Research Veterinary Institute and the OIE.

Kazakh Scientific Research Veterinary Institute

"Kazakh scientific research veterinary Institute" LLP has a contractual relationship with the OIE from 2014.

According to the task of the Ministry of agriculture for the Institute within the framework of the program "Scientific provision of veterinary welfare and food safety" are:

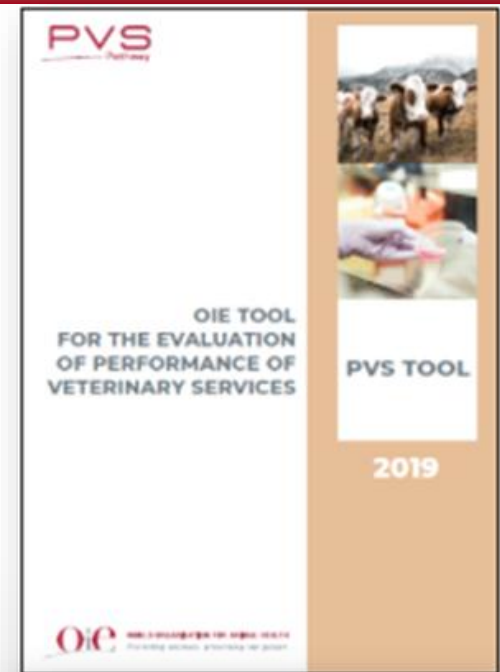

- to attract experts,*
- prepare and submit applications to the OIE,*
- conduct the OIE PVS Pathway Orientation Training Workshop for Eurasia (8-11 October 2019, Nur-Sultan, Kazakhstan).*

Kazakh Scientific Research Veterinary Institute

Workshop objective - to share PVS Pathway experiences and understanding on the PVS Tool to assist Veterinary Services to:

- better promote, prepare for, host and follow up on OIE PVS Pathway missions and reports in their countries;
- enable independent application of PVS Tool methodologies by the VS within their own country (PVS self-evaluation);
- share experiences and lessons learnt on the successful application and use of the PVS Pathway in the region;
- have successful trainees participate as trainee experts on OIE PVS Pathway missions to other countries within Europe and Asia;
- pending performance at the training and as trainee expert on a mission, allow select trainees to gain full certification as OIE PVS Experts with the capacity to undertake missions globally;
- enable your trained staff to participate in national or regional PVS Pathway Follow Up workshops to undertake analysis and plan for implementation of recommendations to strengthen Veterinary Services (at national and regional level).

This training workshop used the newly developed 7th Edition of the PVS Tool which contains new Critical Competencies on antimicrobial resistance and use and Veterinary Clinical Services.
