VS

The renovation of the OIE Regional websites

- Part of **OIE digital transformation** to ease the access to information about animal health in the regions
- **Harmonized** structure and layout among all regions
 - **User friendly** and accessible from all devices
 - New space for **Regional Projects**
- **Easy access** to latest news and events in the region
- Connected with the new OIE-WAHIS for **immediate disease notifications**

- ✓ Own colour
- ✓ Same link as before
- ✓ More and updated content
- ✓ Upcoming events and latest news easy to find
- ✓ Immediate disease notifications filtered by Region (OIE-WAHIS)
- ✓ In English and Russian

Progressive Control of Transboundary Animal Diseases

INTRODUCTION

The Global Framework for the Progressive Control of Transboundary Animal Diseases (GF-TADs) is a joint initiative of the World Organisation for Animal Health (OIE) and the Food and Agriculture Organization of the United Nations (FAO), which combines the strengths of both organisations to achieve agreed common objectives.

PROJECT FINANCED BY

-  Food and Agriculture Organization of the United Nations (FAO)
-  World Organisation for Animal Health (OIE)
-  European Commission

Project page

Project Menu

Same than the
Main Menu

The screenshot shows a web page header with a dark red navigation bar. On the left, it displays 'REGION : Europe' and 'English'. On the right, it includes 'Login', 'Main site', and 'Search'. Below the navigation bar, there is a blue sidebar with the 'GF-TADs Europe' logo and a 'PROJECT MENU' button. The main content area is white and contains a 'GF-TADs Europe' section with a description and a list of project-specific pages. A red callout box points to the list of pages.

GF-TADs Europe

The Global Framework for the Progressive Control of Transboundary Animal Diseases (GF-TADs) is a joint initiative of the World Organisation for Animal Health (OIE) and the Food and Agriculture Organization of the United States.

The Animal and Plant Health Agency (APHA) is an executive agency of the UK Department for Environment, Food & Rural Affairs and also works on behalf of the Welsh Government and the Scottish Government.

Our headquarters is located at APHA Weybridge near London in Surrey, UK with additional regional laboratories, offices and border inspections points across the UK, employing around 2,200 staff.

Our mission is to protect animal and plant health for the benefit of people, the environment and the economy.

APHA has a long standing reputation as a world leading centre of veterinary science expertise, acknowledged by our status as a National and International Reference
