

Tenth meeting of the Regional Core Group (RCG10)

Budimir Plavsic
Regional Representative

OIE Observatory

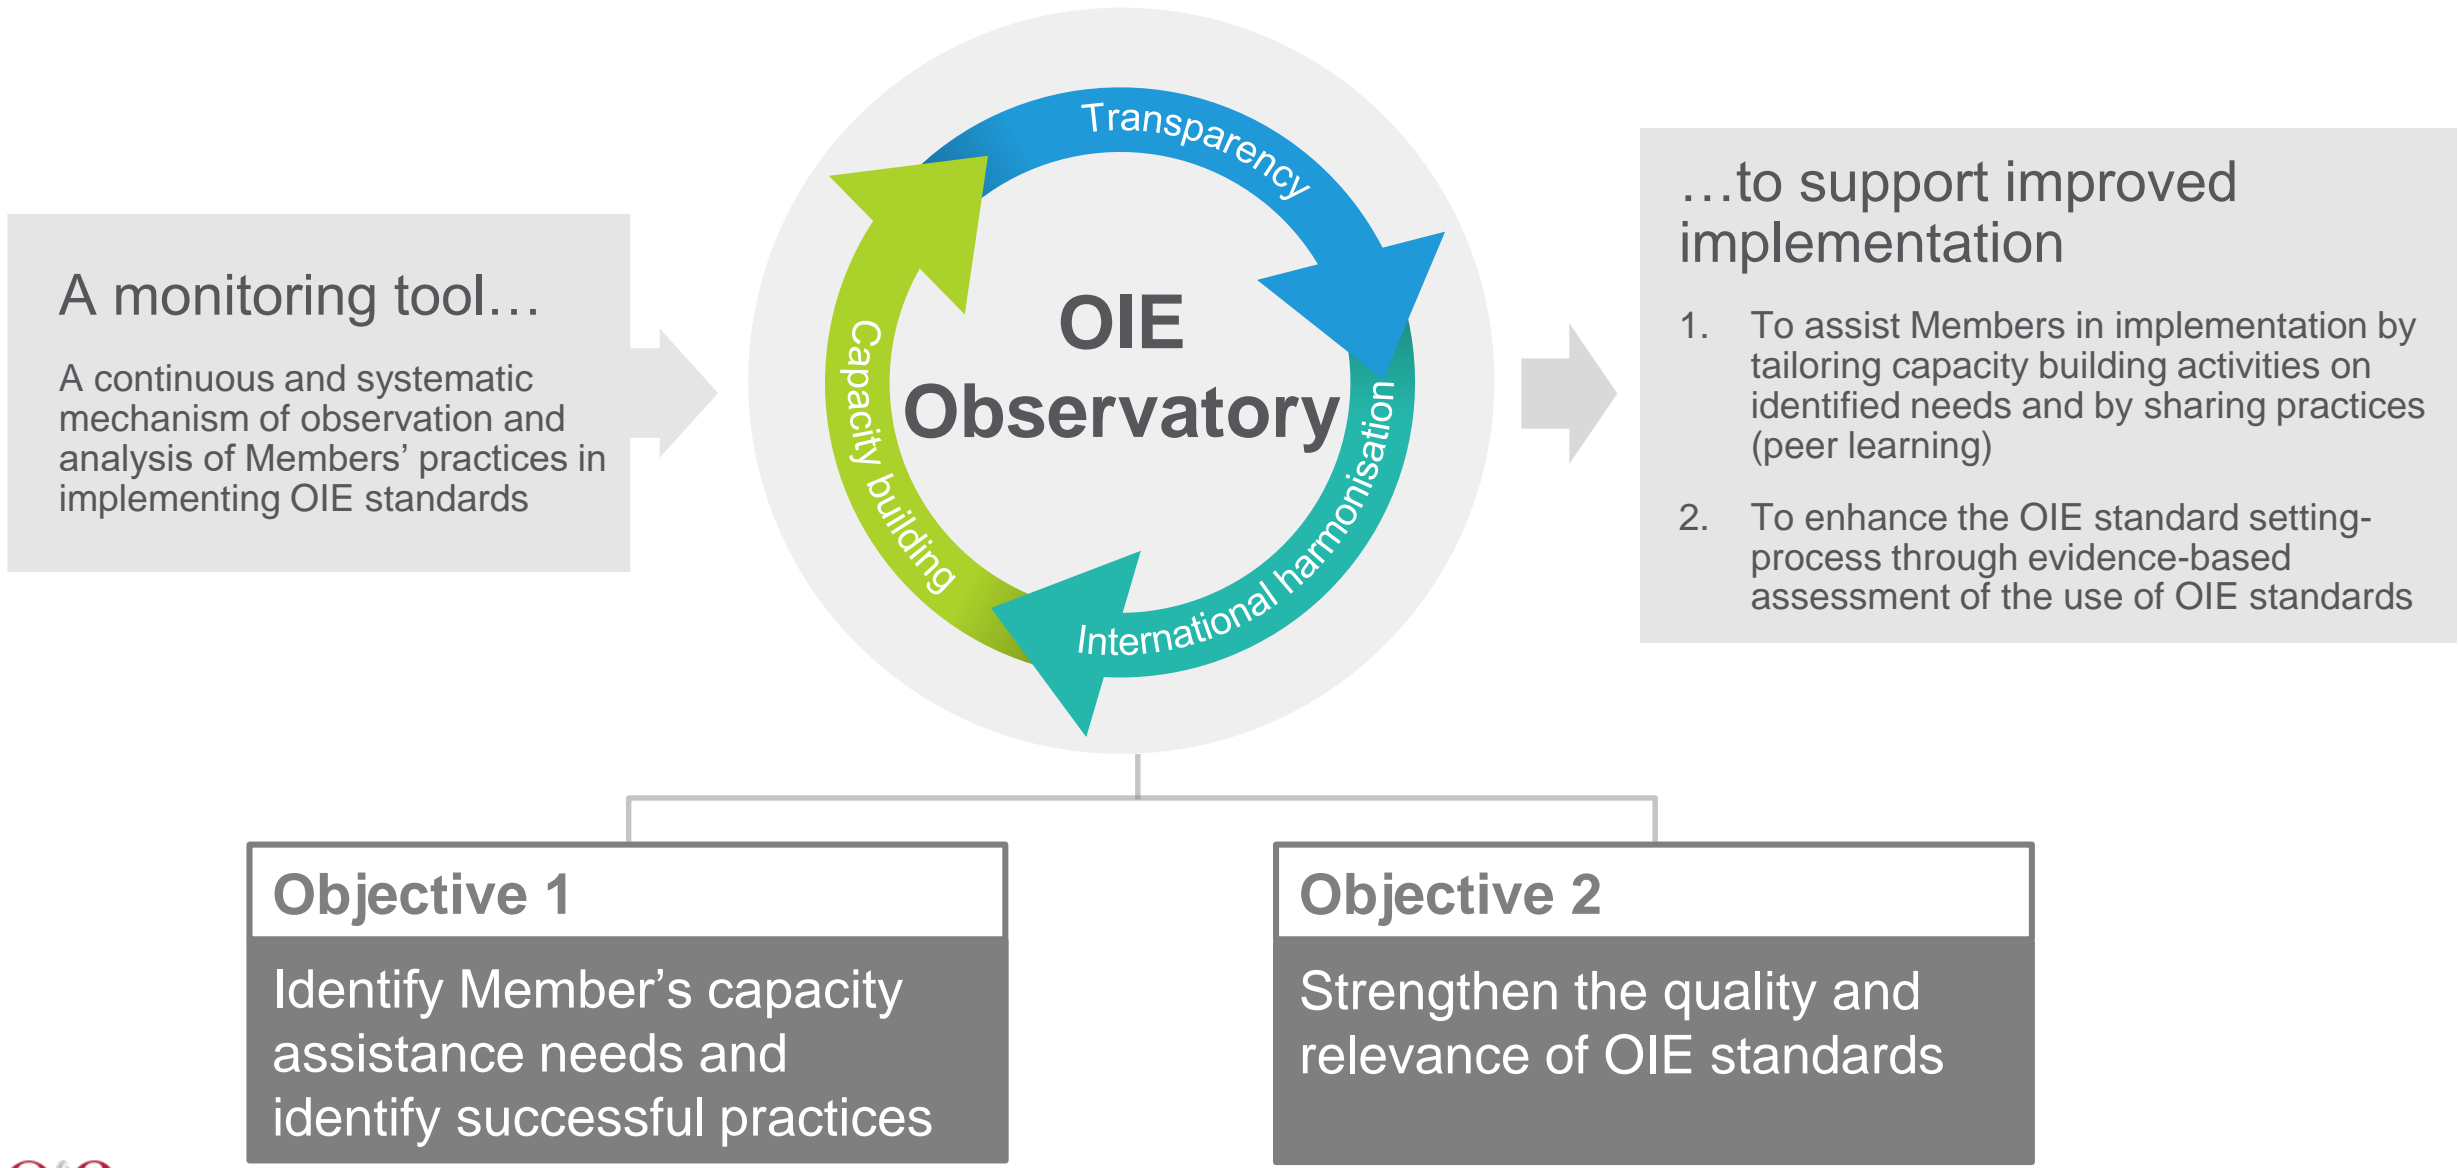

London, United Kingdom
2-3 December 2019

Project management approach

Objectives of the OIE Observatory

Key outputs of the OIE Observatory

1

Implementation review report

High-level summary on the situation of the implementation of OIE standards; identification of the major implementation challenges and effective practices.

2

Thematic analysis

More comprehensive and focused analysis on priority topics, to better understand implementation challenges and to evaluate the quality and relevance of OIE standards.

3

Country portal

Available on the OIE website, providing information by country for existing public data on the implementation of OIE standards.

Scope & Pilot phase

- **Scope:** *Terrestrial & Aquatic Codes + Manuals*
- **Pilot Phase : Focus** on OIE standards that already benefit from **quality data coverage**

PILOT PHASE - SELECTED STANDARDS

Standards addressing **key cross-cutting issues:**

- Notification
- Surveillance
- Zoning and Compartmentalisation

▶ **Applied to selected terrestrial animal diseases**

DATA SOURCES

WAHIS
PVS Reports
Official status
Self-declarations
FAOLEX
WTO SPS notifications
STCs

Timeline and Communication plan

2019

Council

September
2019

Endorsement by the Council
of the **KEY FEATURES** of the
future **Observatory**:

- OBJECTIVES
- THE 3 KEY OUTPUTS
- SCOPE & PILOT PHASE

**Member
Countries**

November
2019

**COMMUNICATION TO
MEMBER COUNTRIES**

LETTER from DG to the
OIE Delegates, with
OECD draft report
attached
(RR/SRR in copy)

2020

Council

February
2020

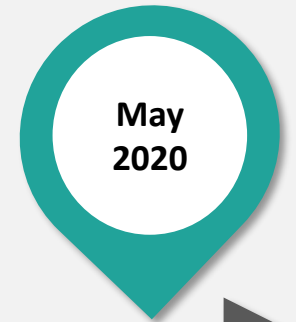

Endorsement by the Council of the
- **SCENARIO** to develop the three
defined outputs of the **Observatory**
- **ROADMAP** with Objectives/Activities
for short, medium and long term

PUBLIC COMMUNICATION

Event with OECD SG + OIE Council
Press or Press release

Explaining what the Observatory will be and
how / when the outputs will be delivered

88GS

May
2020

PRESENTATION
through 7th Strategic Plan

**COMMUNICATION
DURING GS**

- **BROCHURE** (including
objectives, scope, outputs,
high level roadmap with
timeline)

- Update of **OIE WEBPAGE
ON OBSERVATORY**

Tenth meeting of the Regional Core Group (RCG10)

Budimir Plavsic
Regional Representative

OIE Aquatic Animal Health Strategy

London, United Kingdom
2-3 December 2019

Aquatic animal production is important

- **Growing importance for human nutrition and economies**
 - Highest per capita consumption in history (and growing)
 - Greater than 1/3 production volumes traded internationally
- **Aquaculture production continues to grow**
 - At current growth rates aquaculture production will double by 2030

BUT...

- Disease continues to be a major threat to aquaculture production
- Efforts to manage aquatic animal health have not kept pace with growing risk

Drivers of an Aquatic Animal Health Strategy

- There is shared and growing importance in aquatic animal production
 - There is a shared and continuing threat of aquatic animal diseases
 - There is a shared need to develop and implement collaborative actions to improve aquatic animal health and welfare.
- 

How an OIE Aquatic Animal Health Strategy can address these issues

- Identify the highest priority common needs
- Coordinate actions to the priority common needs
- Identify actions that provide enduring impacts
- Provide for better utilisation of existing resources, networks, systems
- Allow for a focus on areas of importance to aquatic animal health while supporting the 7th Strategic Plan
- Identify attractive opportunities for donor investment.

The ultimate goal is to improve aquatic animal health worldwide

Who, how and when?

- Aquatic Animals Commission is leading this work in collaboration with HQ
- You will be consulted
- To be launched at the 2020 General Session
- For the years to come – Implementation - this is where the real work will start!

A hand is holding a white rectangular sign in the foreground. The sign has the words "THANK YOU" written in large, bold, black, sans-serif capital letters. The letters are cut out, revealing a close-up of a brown chicken's head with a red comb and wattle. The background is a blurred outdoor setting with several other brown chickens on a dirt ground. The overall scene is bright and natural.

THANK
YOU
