PROCEDURE FOR THE APPLICATION FOR THE PUBLICATION BY THE OIE OF A SELF DECLARATION OF DISEASE FREEDOM

June 2019

CONTEXT

The OIE has developed Standard Operating Procedures (SOPs) to assist Members with the process relating to the official recognition of a specific disease status, for the official recognition of a risk status for bovine spongiform encephalopathy (BSE) or for the endorsement of a national official control programme. The SOPs currently apply to the official recognition of disease status for six OIE-listed terrestrial animal diseases, namely: African horse sickness, classical swine fever, contagious bovine pleuropneumonia, foot and mouth disease, peste des petits ruminants and for BSE risk status.

However, OIE Delegates also have the possibility to self-declare their country or, a zone or a compartment within their territory, free from any disease. Should Delegates request it, the OIE offers to publish the self-declaration(s) on its website. However, the OIE will not publish self-declarations of freedom related to those diseases for which the OIE has put in place a specific procedure for official recognition of disease status.

Standard Operating Procedure on the publication of the self-declaration of freedom from diseases of Members

Description/ Scope:	This procedure describes the process for the preparation, screening and publication of self-declarations of freedom from any disease (other than those diseases for which the OIE has put in place a specific procedure for official recognition of disease status). The procedure is composed by four parts: <ul style="list-style-type: none"> - Part A: Submission of a self-declaration by a Member, - Part B: Screening and publication by the OIE of a self-declaration submitted by a Member - Part C: Loss of self-declared disease freedom - Part D: Recovery of self-declared disease freedom

DISCLAIMER

The OIE, after performing an administrative and technical screening of a self-declaration concerning the disease-free status of a country, a zone or a compartment ("self-declaration"), as described in the standard operating procedures for self-declarations, reserves the right to publish or not the self-declaration on its website. There shall be no right of appeal from this decision nor any recourse of any kind.

The publication by the OIE of a self-declaration on its website does not reflect the official opinion of the OIE.

Responsibility for the information contained in a self-declaration lies entirely with the OIE Delegate of the Member concerned.

Neither the OIE nor any person acting on its behalf may be held responsible for:

- (i) any errors, inaccuracies or omissions in the content of a self-declaration;
- (ii) the use which may be made of the information contained in a self-declaration;
- (iii) any direct or indirect consequences of any nature arising from or relating to the use of the information contained in a self-declaration.

SELF-DECLARATION BY MEXICO AS A COUNTRY HISTORICALLY FREE FROM GLANDERS-

ЛЮБАЯ ДРУГАЯ БОЛЕЗНЬ НАЗЕМНЫХ И ВОДНЫХ ЖИВОТНЫХ

Declaration sent to the OIE on June 13, 2019 by Dr. Juan Gav Gutiérrez¹, OIE Delegate of Mexico, Secretary of Agriculture and Rural Development, National Service of Health, Food Safety and Quality SENASICA, General Directorate of Animal Health.

I. Glanders situation.

1.1 Proof that it is a notifiable disease to the competent national authorities:

- **ОФИЦИАЛЬНОЕ ЗАЯВЛЕНИЕ**
Responsibility for regulating, administering and promoting health, and food safety and quality activities to reduce the inherent risks in livestock, for the benefit of Mexican farmers, consumers and the industry falls to the Ministry of Agriculture and Rural Development (SADER), through the National Health Service, Food Safety and Food Quality (NASICA).
- **ПРИ ОТВЕТСТВЕННОСТИ ЧЛЕНА МЭБ**
Glanders is notifiable to SADER-SENASICA, and its epidemiological surveillance is based on the following legal instruments published in the Official Journal of the Federation.
- **ЧЛЕН МЭБ ЗАЯВЛЯЕТ О БЛАГОПОЛУЧИИ**
 - i. 16 February 1988.- Agreement to set up the National Animal Health Emergency System in the Secretariat for Agriculture and Water Resources ([Annex II](#)).
 - ii. 19 February 1997.- NOM-046-ZOO-1995, National Epidemiological Surveillance System (SAVE) ([Annex III](#)) amended on 29 January 2001 ([Annex IIIa](#)).
 - iii. 8 June 1998.- NOM-054-ZOO-1996, Quarantine stations for animals and animal products ([Annex IV](#)).
 - iv. 11 January 1996.- NOM-027-ZOO-1996, Animal health process for semen from domestic animals ([Annex V](#)).

The screenshot displays the WAHIS Interface website. At the top, there is a header with the title "WAHIS Interface" and the subtitle "Animal Health Information information zoosanitaire Información Zoonitaria". On the right side of the header, there are links for "OIE Home Page" and "English | Français | Español". Below the header is a navigation bar with tabs for "WAHIS Interface", "Country information", "Disease information", "Disease control measures", "Data between 1996 and 2004", and "World Animal Health".

The main content area is titled "World Animal Health Information Database (WAHIS) Interface". It contains the following text:

The WAHIS Interface provides access to all data held within OIE's new World Animal Health Information System (WAHIS). It replaces and significantly extends the former web interface named Handistatus II System.

A comprehensive range of information is available from:

- immediate notifications and follow-up reports submitted by Country / Territory Members notifying exceptional epidemiological events current in their territory
- six-monthly reports stating the health status of OIE-listed diseases in each Country / Territory.
- annual reports providing health information and information on the veterinary staff, laboratories and vaccines, etc.

Below this text are three main sections:

- + Info by Country/Territory**: Information about a specified country, including exceptional disease event reports, animal health status, veterinary services, population, vaccination, etc. (Accompanied by a world map icon).
- + Control measures**: Lists and maps of the prophylactic and control measures used by countries and by disease. (Accompanied by an icon of a vaccine vial).
- + Disease information**: Information about a particular disease, including global disease distribution maps, outbreaks maps, lists of countries indicating their sanitary statuses, etc. (Accompanied by a circular icon with various symbols).

On the right side of the main content area, there is a video player titled "+ WAHIS Video". The video title is "WAHIS: Protecting animals, preserving our...". The video player shows a person sitting at a desk with a computer monitor displaying a flowchart.
