

The GF-TADS Initiative for the Global Control of ASF (2020-2025)

May 2020

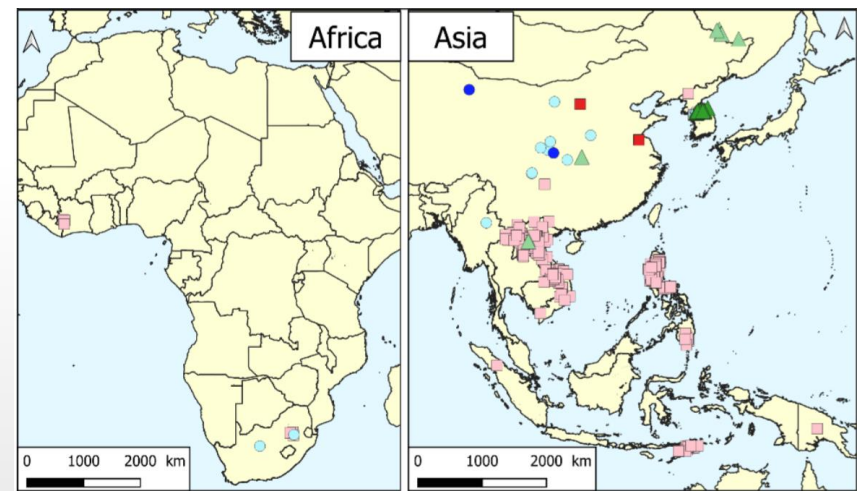

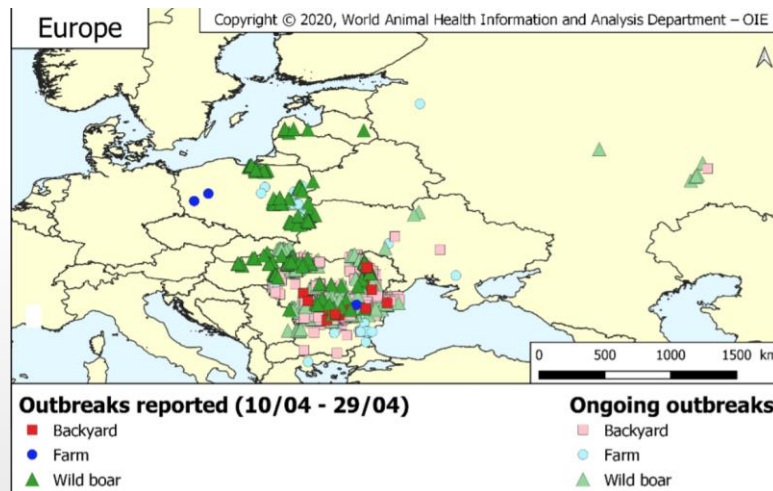

Global situation of ASF

OIE WAHIS disease outbreak map, annually (2005-2020)

Global situation of ASF

Probably the biggest animal disease outbreak ever seen

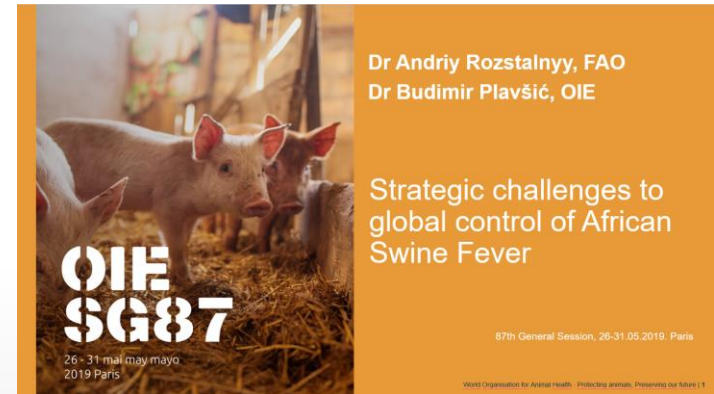

Report N° 42: April 10 – 20, 2020

<https://www.oie.int/en/animal-health-in-the-world/information-on-aquatic-and-terrestrial-animal-diseases/african-swine-fever/reports-on-asf/>

87th General Session, Technical item 2

- ASF → Global threat
- ASF transmission → Diverse drivers
 - Human mediated
 - Wild pigs
 - Habitat contamination
- ASF control → High global priority
- Effective measures: biosecurity
- Resolutions no. 33
 - Key roles for OIE, FAO and Members
 - Launch a global initiative

Global control of ASF, GF-TADs initiative

- Developed by FAO and OIE
- Provide a platform to harmonise and coordinate national and regional efforts
- Create a framework to ensure synergies and good coordination
- Consider the realities of the regions directly or indirectly impacted by ASF
- A 6-year (2020–2025) strategic plan linked to a 2-year operational plan
- Define the objectives and provide structure for specific outputs and outcomes to achieve global control
- Monitoring of indicators at output level by FAO and OIE

The elements of the Initiative

Narrative

- Defines the call for action, strategic challenges, governance, M&E and the theory of change

Theory of Change

- Schematic representation of chain of events required to achieve the goal
- Consists of problem statement, and links the objectives, outputs and outcomes to achieve goal

Logic framework

- Heart of initiative
- Defines the problem, objectives, outputs, outcomes and the overall goal
- Indicators for evaluation and monitoring of progress

Operational plan

- Specific activities implemented under **GF-TADS** responding to the objectives

Global control of ASF, GF-TADs initiative

ASF is a global threat to food security with negative socio-economic impact. Although control is feasible, success requires regional and global coordination.

PROBLEM STATEMENT

Goal and purpose

The goal is defined as achieving global control of ASF.

KEY FACTORS FOR SUCCESS

Intelligence framework
disease intelligence,
information management

Capability
strong veterinary services,
technical competency

Risk communication
strengthen commitment
and cooperation

Resources
adequately available and
sustainable

Global control of ASF is achieved*

No new countries affected with ASF

Decline in the number of countries affected by ASF

Decline in the number of ASF cases

Reduced losses due to ASF

* The goal is achieved by meeting the four defined criteria. Meeting some of the criteria would indicate progress in achieving global control

No new countries affected with ASF

Decline in the number of ASF affected countries

Decline in the number of ASF cases

Reduced losses due to ASF

* The goal is achieved by meeting the four defined criteria. Meeting some of the criteria would indicate progress in achieving global control

OUTCOMES

OUTCOME 1

Capability of countries to control ASF is improved

- Improved understanding of strengths & weaknesses of the Veterinary Services to control ASF
- Improved capability to conduct risk assessment
- Improved capability to conduct risk management
- Improved capability to conduct risk communication

OUTCOME 2

Regional & global coordination and cooperation is improved

- Disease information is transparent, accurate, up to date and accessible
- Effective regional & global expert networks strengthen inter-sectoral coordination & cooperation
- Development agencies and technical partners recognise values of ASF control and provide financial & technical support
- ASF global research is active and coordinated addressing needs

OUTCOME 3

National & international trade based on international standards and guidelines is facilitated

- International standards for safe trade are understood, accepted and promoted
- International standards are implemented effectively

OUTPUTS

OBJECTIVES

OBJECTIVE 1

Improve capability of countries to control ASF **

OBJECTIVE 2

Establish effective coordination and cooperation framework

OBJECTIVE 3

Facilitate business continuity

Standing Group of Experts on ASF

- Under the FAO/OIE GF-TADs umbrella
- Promote exchange among risk managers and international and national experts
- Coordinate disease control policies
- Mechanism to support international and regional solidarity and cooperation
- Key role for the success of global initiative
- Established in Europe, Asia and Americas
- Meetings continue despite COVID-19

WORLD ORGANISATION FOR ANIMAL HEALTH
Protecting animals, preserving our future
