Information about ASF Czech Republic

GF – TADs, 6. 5. 2020
Petr Šatrán

From the first case 26. 6. 2017 to the last case 8. 2. 2018 - 9 months – 228 days

RISK OF INTRODUCTION OF ASF IN WILD BOAR IS RELATIVELY HIGH

Cross border collaboration on all levels

CZ+DE field meeting in 03/2020

Measures in place with aim

- Whole year intensive hunting of feral pigs, regardless of age category and sex, with the possibility of using some prohibited hunting methods
- Ban of wild boars feeding and restriction of baiting (20 kg / 1 bait / 50 ha of hunting)
- Ban on feeding domestic pigs with catering waste and kitchen waste
- Ban of imports of "trophies" from countries with AMP
- Training of hunters for testing and biosecurity
- Prohibition on the use of hay and straw in pig farms from countries with AMP

Year	Number of hunted WB
2012	98 852
2013	125 193
2014	126 098
2015	185 042
2016	163 546
2017	230 998
2018	146 686
2019	237 246
2020 (to 31.3.)	59 804

ASF surveillance with aim - Early Detection System

- in wild boar - all found death wild boar, including traffic accident to be examined for ASP (supported by the **payment of CZK 2,000 (80 €) / sample**).
- in domestic pigs – testing in case of sudden deaths without clear cause or with suspected ASP, mass deaths, abortion
