# The Observatory

# ROADMAP - Key milestones

# 1st Annual implementation standards review & Prototype on ASF

- Planned at the end 2022 - early 2023 (with data collected in 2021 - 2022)

## Indicators

From existing data (OIE and publicly available)

Not collected for this purpose and limitations

Association for a broad picture

## Inclusive approach

Constant involvement of relevant departments

Workload vs ownership and buy-in

## Tool for analysis & visualisation

Observatory Portal

Power BI dashboard

Securing confidentiality

## Catalogues

Data /metadata catalogue

Indicator matrix

## Lessons learned & critical analysis

From previous prototypes

From this prototype

For the development of the annual report

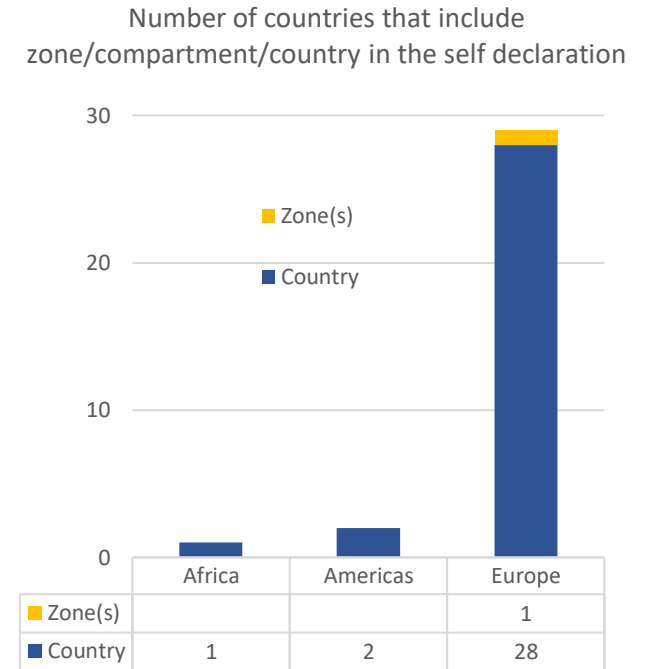

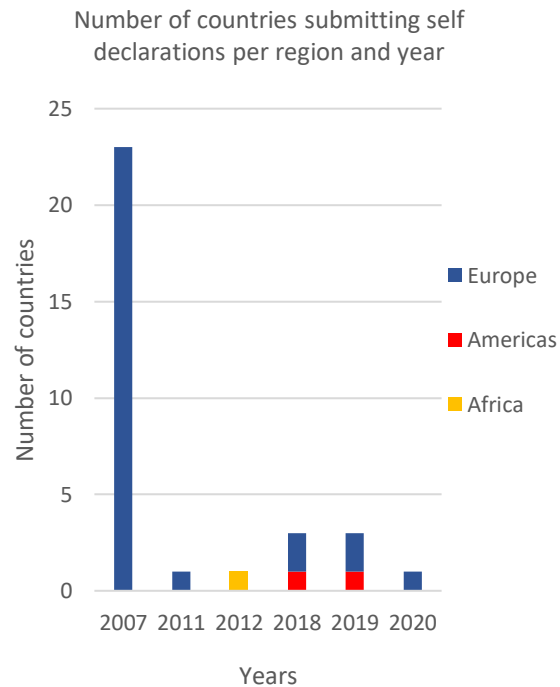

For internal improvement

Potentially for discussion with partner organisation

# ASF prototype – structure and example of the self-declaration

- A. Performance of Veterinary Services
- B. Workforce and other resources
- C. WTO notifications
- D. Disease surveillance
- E. Transparency
- F. Prevention and control measures
- G. Self-declarations**
- H. Zoning and compartmentalisation
- I. Emergency preparedness
- J. ASF Strategy

<b>98</b> territories reported absence of ASF (domestic/wild) in WAHIS	<b>22</b> countries have active ASF self-declaration	<b>1</b> country has self-declared freedom from ASF in a <b>zone</b>	<b>0</b> country has declared a <b>compartment</b> free from ASF
--	--	--	--

Self-declarations  
(for a country/, zone or compartment)

OIE WAHIS six-monthly reports  
(occurrence codes)

External sources (World Bank ...)

Interest in publishing self-declarations on the OIE website?  
Discussion on the model? Workload, resources, links with WAHIS/PVS?  
Structure of the data included in self-declaration?

# Engagement with Stakeholders (external and internal)

OECD  
& OIs partnership

WTO SPS team

IPPC & Codex

OIE Departments

RR/SRR

Observatory Steering Committee  
January 2022

Observatory Reference Group  
Feb-March 2022

OIE Members

*To be expanded?*

# How to best monitor the implementation of OIE standards?

## A new pilot with the Aquatic Strategy

- New Aquatic Commission and workplan
- New strategy with some activities linked to the identification of barriers to the implementation of standards/to notification
- No direct information on this matter
- Need to consult the countries via a survey to national aquatic focal points
- If impactful/useful could be extended to other areas and/or repeated every 3 years
- Link to thematic analysis

## Reflexion on the national implementation of recently adopted standards

- Levels of implementation
- Limited existing data and impossible to check
- Shall we collect this information and if so how?
- Consultation with colleagues, regional core groups...

### Monitoring the implementation of OIE standards

Identify where and how to improve the whole process  
(enhancement of OIE process, communication and advocacy,  
capacity buildings)

Better implementation of OIE standards  
for improving animal health, animal welfare and  
veterinary public health

Thank you
