

DAY 1

REMARKS

Complex system

Challenges of working with wildlife diseases

- Lack of enough resources to manage WD
- Not enough awareness of authorities about WD importance
- More fluent and long-term communication is needed

World Organisation
for Animal Health
Founded as OIE

6th cycle Training of National Wildlife Focal Points World Organisation for Animal Health European Region

Small changes can have meaningful impacts

- Understand the **local context** to build successful collaborations
- Stakeholder engagement and identify key players → include them in the project design
- Good, fluent and regular **communication** is KEY 
- Opportunity → exchange experiences, increase knowledge, build and reinforce connections
