

# **SAM System for Dog Population Managment (SAM4DPM)**

Silvia D'Albenzio

SDB5 Workshop  
Croatia, 2023 July 4

## THE «SO WHAT» OF THE SAM<sub>4</sub>DPM

To explore the relevance of **developing National Action Plans for stray dog population control** as support to local governmental authorities in the implementation of dog population control programmes (DP-CPs) compliant with the WOAHS Standards and to **ensure monitoring and evaluation of their implementation.**

To conduct the **self-assessment regularly**, and have an understanding of their **progress over time.**

**SAM**  
s y s t e m  
**4DPM**

Self-Assessment and Monitoring System  
for Dog Population Management

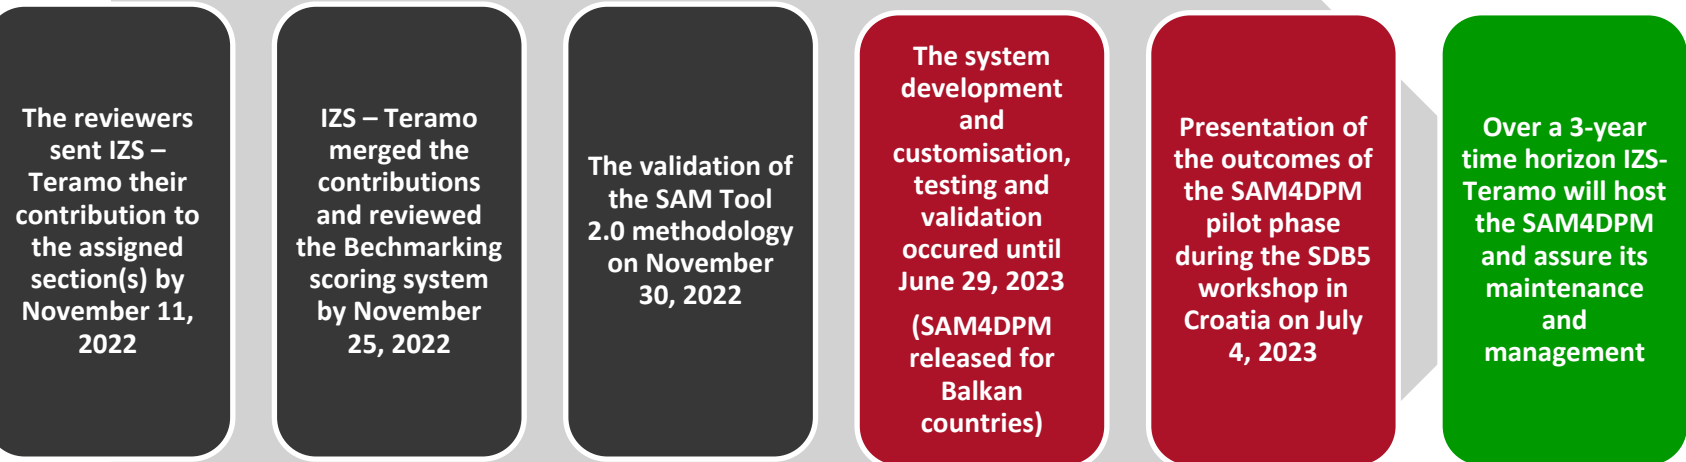

## The core of SAMSYSTEM4DPM

- **Section I** – Understanding the situation on stray dogs
- *Section I-bis – Understanding the situation on rabies – rabies sub-group*
- **Section II** – Control measures
- **Section III** – Monitoring and evaluation
- **Section IV** – Conclusions and next steps

## Questionnaire

**Country roadmap**  
**towards the full**  
**implementation of**  
**Chapter 7.7 of the**  
**WOAH TAHC**

**PART I - SWOT ANALYSIS**

Please, draft the SWOT Analysis, identifying strengths and weaknesses emerging from the country self-assessment and benchmarking reports. Please, also include opportunities and threats that relate to the implementation of the Chapter 7.7 of the WOAH TAHC to reflect on the overall situation concerning dog population management in the country. The SWOT Analysis will guide you in the definition of the country roadmap towards the achievement of the full implementation of the mentioned WOAH Standards, according to the deadline established by the WOAH Platform on Animal Welfare for Europe.
