

4th Regional Workshop on Dog Population Management for Western Eurasia (SDWE4)

Janybek uulu Ayanberdi

Tbilisi, Georgia, 26-28 September 2023.

I. Understanding of the situation in the country

More than 300,000 dogs are vaccinated against rabies per year,

More than 260,000 registration books (passports) were issued and 260,000 dogs were registered in the Dogs database.

More than 20,000 stray dogs are isolated annually.

II. Control measures

- Vaccination against rabies is carried out once a year
- Deworming against cestodosis is carried out four times a year
- **Among pets:** Vaccination, control of the number of stray animals, capture, accounting of dogs and cats.
- **Wild fauna:** regulation of carnivore populations, systematic oral vaccination with mandatory monitoring of vaccination efficacy.

From 2022, in large cities (Osh, Bishkek) they started capturing stray dogs for further sterilisation

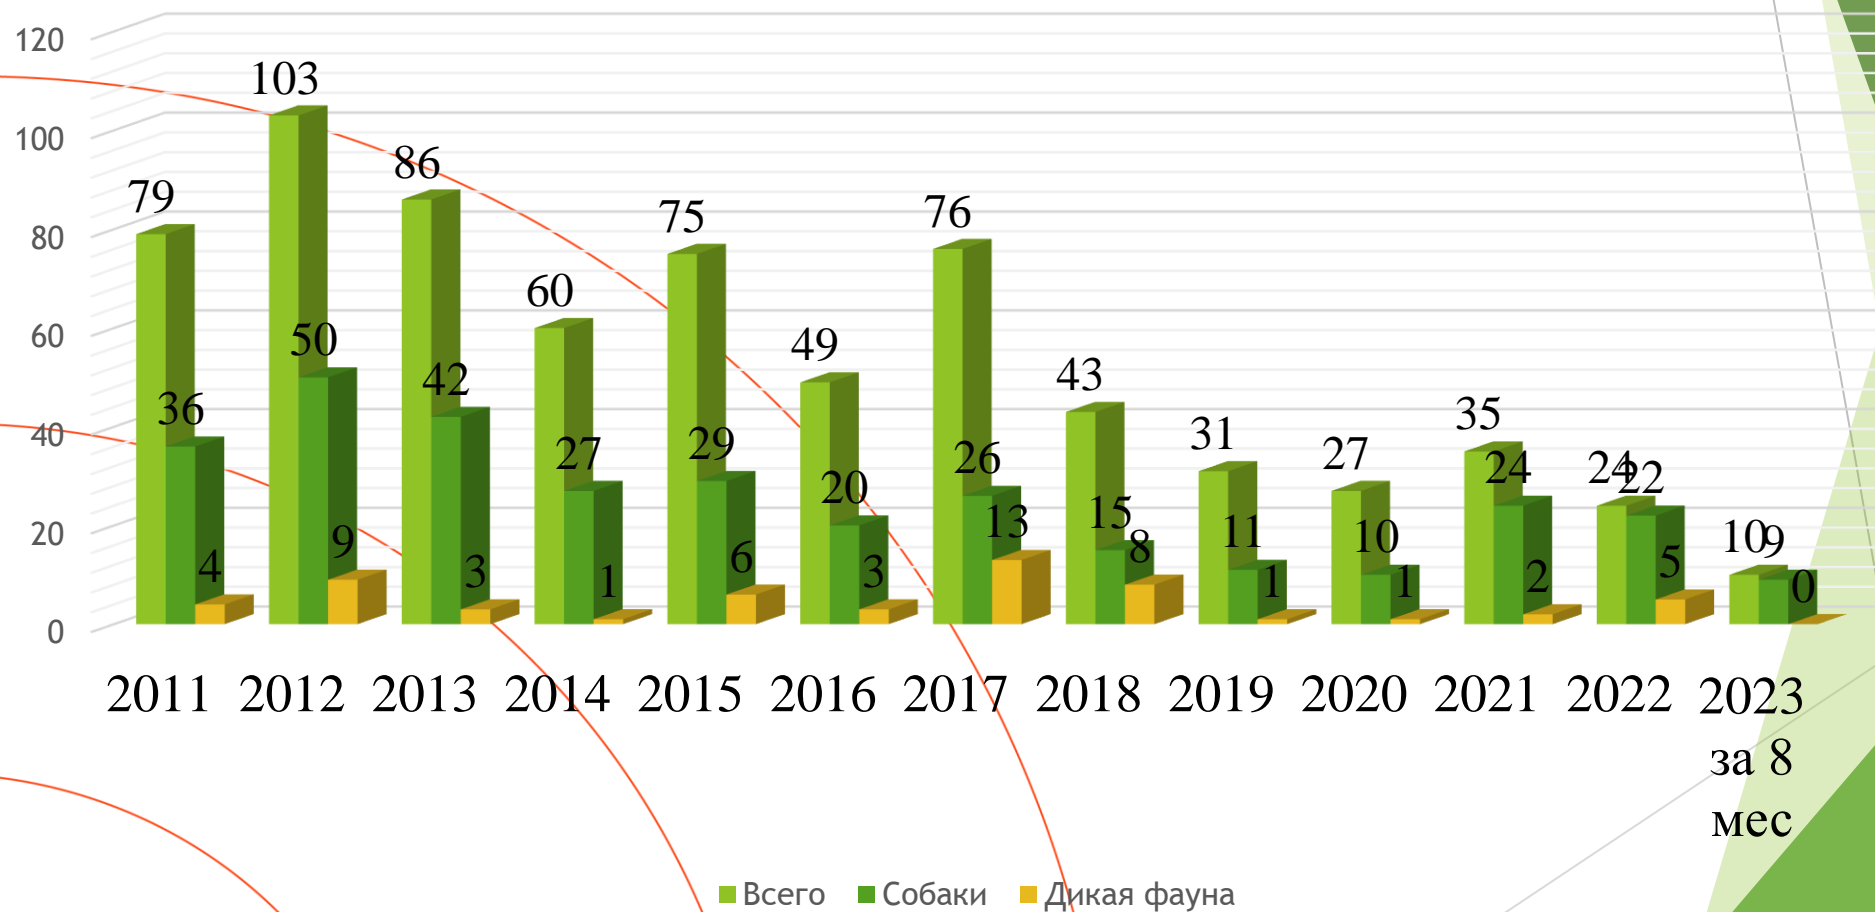

III. Monitoring and evaluation

The following activities are carried out according to the anti-epizootic plan;

- 1. Serological tests for brucellosis;**
- 2. Caprological examination for helminthiasis and cestodoses;**
- 3. Active monitoring for cestodoses.**

IV. Rabies measurement

V. Country Roadmap Key Actions

Strategic Plan for Echinococcosis Control in the Kyrgyz Republic for 2019-2023

Strategic plan for rabies prevention and control in the Kyrgyz Republic for 2023 - 2027.

On 25-27 July 2023 in Bishkek, an interdepartmental workshop on the evaluation of the development strategy of the Veterinary Services and PVS evaluation was held together with 4 OIE international experts.

V. Success stories

Developed and installed a computer programme (DOGS) to provide an electronic database of dog registration and prevention information

From 2022, in large cities (Osh, Bishkek) they started capturing stray dogs for further sterilisation
