Fisheries and Forestry**

# Livestock Export Sea Transport: An Australian Perspective

8 November 2023

Dr Carol Sheridan  
Assistant Secretary  
Animal Welfare Branch

---

# Overview

- Global Cattle and Sheep Trade
- Australia's Regulatory Framework
  - Australian Standards for the Export of Livestock (ASEL)
  - Export Supply Chain Assurance System (ESCAS)
- Challenges to welfare management in the livestock supply chain

# Global Cattle and Sheep Trade\*

Share in world cattle exports (%)

Country	Value exported in 2022 (USD thousand)	Share in world exports (%)
Rest of the World	2857471	43.3
France	1746978	19.7
Canada	1159933	13.1
Australia	879889	9.9
Mexico	483609	5.4
USA	453941	5.1
Colombia	310041	3.5
Netherlands	263269	3
Spain	249505	2.8
Czech Republic	242431	2.7
New Zealand	238090	2.7

Share in world sheep exports (%)

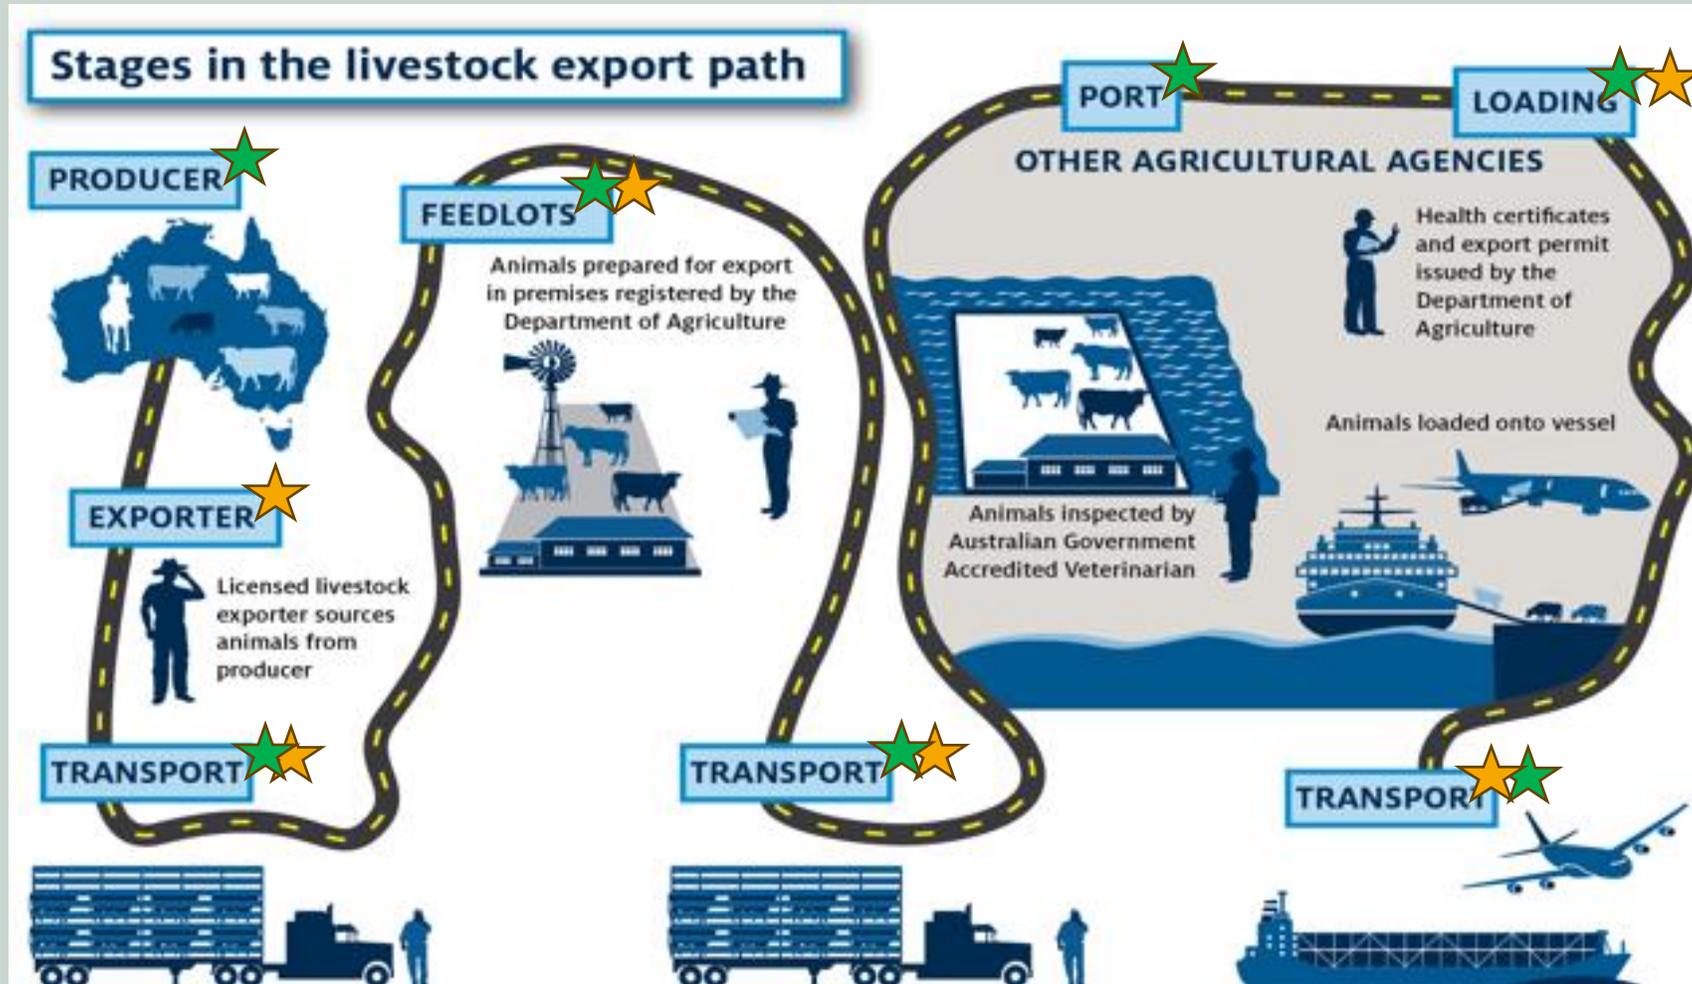

Country	Value exported in 2022 (USD thousand)	Share in world exports (%)
Rest of the World	1224185	19.1
Romania	278535	22.8
Spain	192875	15.8
Jordan	119140	9.7
Portugal	89120	7.3
Türkiye	64117	5.2
Australia	59684	4.9
Hungary	52709	4.3
Kyrgyzstan	47690	3.9
France	46501	3.8
Namibia	39247	3.2

# The Export Regulatory Framework

- Australian export legislation
  - Export Control Act 2020
    - ✓ Importing country requirements
  - Export Control (Animals) Rules 2021
    - ✓ The Australian Standards for the Export of Livestock (ASEL)
    - ✓ The Export Supply Chain Assurance System (ESCAS)
- State and Territory regulations
- Marine Order 43–Cargo and cargo handling–livestock

# Livestock Export Process

Animal welfare in the export supply chain by

- DAFF (1 yellow star)
- other agencies (1 green star)

# AUSTRALIAN LIVESTOCK EXPORT ROAD MAP

Final inspections of animals for fitness to transport prior to loading

## EXPORTER

Licensed livestock exporter sources animals from farmers

## FEEDLOT

Animals are quarantined for export in feedlots and inspected for health and welfare

## TRANSPORT

## OTHER AGRICULTURAL AGENCIES

Official documentation issued by the Department of Agriculture

## DISCHARGE

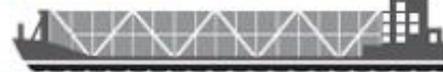

Animals unloaded at their destination

## TRANSPORT

## TRANSPORT

## LOADING

Animals loaded onto ships or aircraft

## TRANSPORT

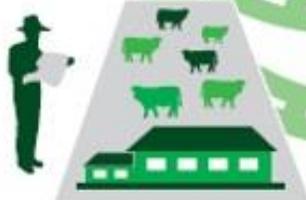

## BREEDING FARM

Animals supplied to overseas producers for breeding

# ASEL ESCAS

## FEEDLOT

## TRANSPORT

## PROCESSING

Livestock are processed for consumption

## CONSUMER

# The Australian Standards for the Export of Livestock - ASEL

- Exporters must ensure Australia's minimum animal health and welfare conditions - outlined in the ASEL - are met for all export livestock
  - cattle, sheep, goats, buffalo, deer, and camelids
  - throughout the export supply chain, sourcing to disembarkation

ASEL 3.2 (November 2021) is current and available at [Australian Standards for the Export of Livestock - DAFF \(agriculture.gov.au\)](https://www.daff.gov.au/australian-standards-for-the-export-of-livestock) and an ASEL app is available through Google Play at <https://play.google.com/store/apps/details?id=au.com.livecorp.aselhandbook.app&hl=en&gl=US>

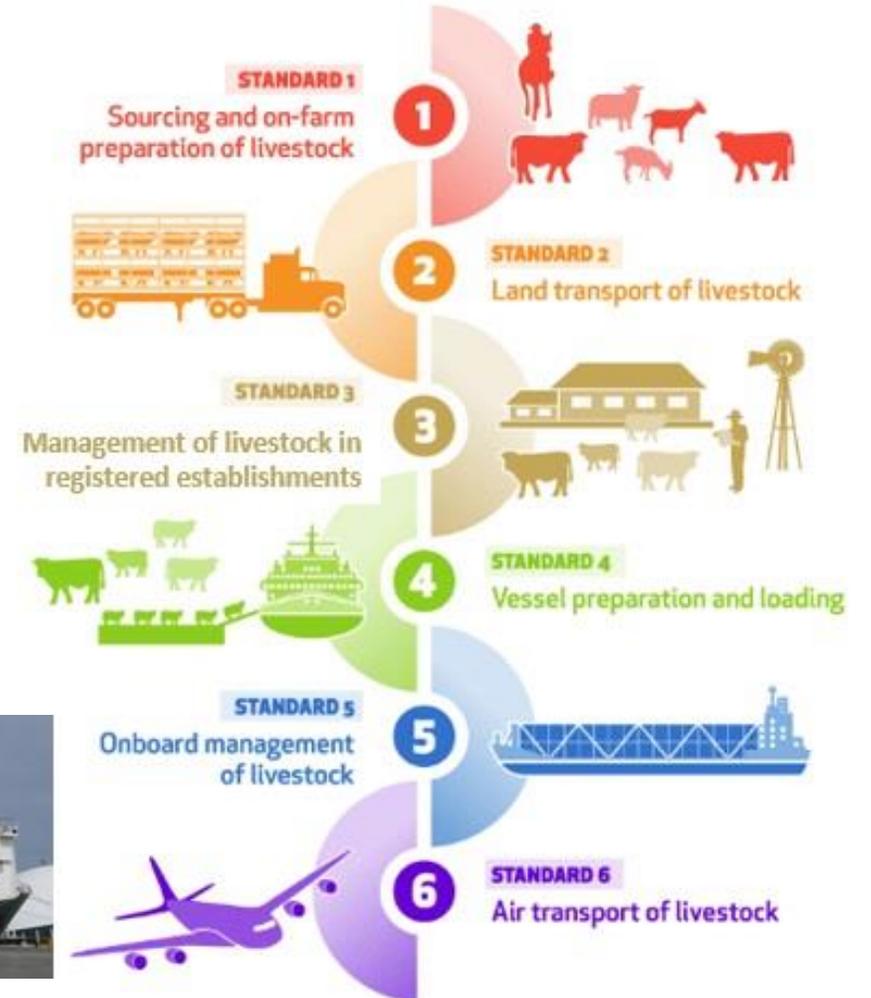

# Australian Standards for the Export of Livestock 3.2

# ASEL

## AUSTRALIAN STANDARDS FOR THE EXPORT OF LIVESTOCK

# Registered Establishments

- Livestock assembled/quarantined to meet importing country requirements and ASEL
- Preparation of livestock exported by sea
- Welfare Management
  - Accredited veterinarian oversees preparation and ensures animals meet ASEL and importing country requirements
  - A government veterinarian undertakes pre-export inspection
  - Animal records must be kept by the registered establishment
    - morbidities, treatments and mortalities
  - A mortality report for each consignment at the registered establishment must be provided to the department

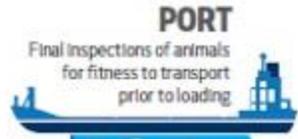

# On board welfare management

- Fodder and minimum reserve fodder requirements
- Ad libitum access to water
- Bedding requirements
- Accredited stockperson and/or veterinarian must accompany each shipment
- Notifiable incidents must be reported to the department within 12 hours
- Reports on the health and welfare of the livestock, including animal welfare indicators and conditions on board, must be provided to the department
  - daily and end of voyage
- Minimum stock handlers to livestock ratios

# AUSTRALIAN LIVESTOCK EXPORT ROAD MAP

**EXPORTER**  
Licensed livestock exporter sources animals from farmers

**TRANSPORT**

**FEEDLOT**  
Animals are quarantined for export in feedlots and inspected for health and welfare

**OTHER AGRICULTURAL AGENCIES**  
Official documentation issued by the Department of Agriculture

**DISCHARGE**  
Animals unloaded at their destination

**TRANSPORT**

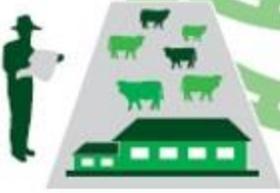

**LOADING**

**TRANSPORT**

**BREEDING FARM**  
Animals supplied to overseas producers for breeding

# ASEL ESCAS

**PROCESSING**  
Livestock are processed for consumption

**FEEDLOT**

**TRANSPORT**

**CONSUMER**

# Export Supply Chain Assurance System

## - ESCAS

To export feeder or slaughter livestock an exporter must

- apply to DAFF for approval of the supply chain in the importing country
- detail the supply chain including feedlots, depots and abattoirs
- ensure all livestock are handled and slaughtered in the importing country in accordance with the approved ESCAS

Information on ESCAS can be found at <https://www.agriculture.gov.au/biosecurity-trade/export/controlled-goods/live-animals/livestock/exporters/escas>

# The 4 Principles of ESCAS

1. Control

2. Traceability

3. Animal Welfare

4. Auditing

# ESCAS non-compliance - actions

## Hypothetical example

Reported non-compliance with ESCAS animal welfare standards for slaughter

## First step

- Department would authenticate the evidence and investigate

## Possible departmental actions if evidence of non-compliance

Proportional to the non-compliance, the department may

- Require an ESCAS assurance management plan
  - Impose additional requirements
  - Direct exporter to cease the supply of animals to facility or to the supply chain
- 

# Welfare management challenges

- Accurate, relevant and objective reporting of animal welfare on the voyage
- Accurate, independent and objective reports on the welfare of livestock in importing countries
- Defining practical, reliable animal welfare indicators

# Addressing challenges

- DAFF checks and verifies export activities for compliance by:
    - Approving /licencing exporters and registered establishment operators
    - Regularly auditing exporters and registered establishments
    - Inspecting livestock (and documents) before export
    - Requiring accredited stockpersons and/or veterinarians on all vessels
    - Deploying independent (government) observers on some vessels
    - Reviewing reports required by ASEL, such as daily and end of voyage reports
    - Reviewing audit reports of ESCAS
    - Investigating/referring reports of non-compliances in the export chain
  - DAFF and LiveCorp are investigating animal welfare indicator options and automated monitoring
- 

# Thank You! Questions?
