# Lumpy Dermatitis - Background Information

- **Vaccination against LSD, including preventive:** – *July 2023, 22,918 heads of cattle were vaccinated against*
- **Surveillance for LSD (active) and surveillance after vaccination :** *In July 2023, there were registrations of contagious dermatitis nodosa in five border areas with the Islamic Republic of Afghanistan. Active surveillance was carried out until the end of December 2023.*
- **Occurrence of LSD:** *July 2023, cases of contagious nodular dermatitis were registered in 5 border areas with the Islamic Republic of Afghanistan; 1,278 heads of cattle fell ill; 281 heads were forced to be abandoned.*

## Lumpy dermatitis – plans for 2024

- **Vaccination against LSD, including preventive:** *Since the epizootic situation is consistently favorable with regard to infectious dermatitis nodosa, vaccination is not planned “Not applicable”*
- **Surveillance for LSD (active and post-vaccination):** *“Not applicable.” Supervision will be carried out since there is a lot of migration of farm animals*
- **health and safety measures :** *It is planned to purchase a vaccine against contagious dermatitis nodosa in order to timely respond to emergency situations*
