Support

Tripartite Zoonoses Guide:
Operational tools and approaches for zoonotic diseases

TZG Workforce Development Operational Tool

Action Track 1: OH systems

Workforce development

- Tool to be launched in 2024
- Focus on strengthening **workforce competencies** to work **across sectors** and disciplines
- To support countries in planning and strengthening a multisectoral, One Health workforce for effective zoonotic disease management.
- To manage zoonotic diseases and other One Health threats
- Flexible in format, scope, and pace of implementation

Identify occupations

Define workforce functions

Ensure human resources are available

Identify existing and missing competencies

Educate and train the workforce

Competencies For One Health Field Epidemiology

COHFE Implementation Phase

Pilot the COHFE framework and supplemental manuals in 3 countries, each in a different region	Develop digital tools for prioritizing, customizing priority competencies and curriculum for programs, and costing tool	Create a repository of One Health field epidemiology training resources	Develop a community of practice for delivering on One Health field epidemiology	Promote the implementation of COHFE framework in other regions and countries to comply with IHR requirements and the OH-JPA

Food and Agriculture Organization of the United Nations

UN environment programme

World Health Organization

World Organisation for Animal Health
Founded as OIE

What do we need to coordinate and collaborate?

Building lifelong learning for the One Health workforce
QPT One Health Learning Task Force
Purpose

Strengthen OH capacity amongst the animal, human, and environmental health workforce of national health systems, in line with the QPT JPA

How?

Stimulating joint activities and experimenting join learning approaches, based on the combined use of the Quadripartite Training mechanisms

Who?

QPT, Partners, Countries

Scope

- Promote a One Health cultural change to inspire a collaborative mindset.
  - One Health will grow through a flexible, interactive, and collaborative **learning system based on existing and successful programmes** and perceived needs for values and behaviour change, that recognises the importance of **cross-sector opportunities** and challenges, using a **competency-based approach**
- Generate new knowledge and bring innovation in health training and learning as well as optimal use and leverage of each organization's assets, methodologies, resources, and tools for learning.

Building bridges

Bringing coherence, guidance, and innovation

Sustainable learning framework for LLL

Offer of CE resources for competency-based learning

Target Audience

Professionals in public health, veterinary health, and environmental health

Actors that have an influence on public health (community health workers and volunteers, health educators, pharmacists, health-services users, food industry, consumer groups); veterinary health (animal farmers, hunters, pet owners, food industry, pharma, animal product consumers), and environmental health (water-sanitation workers; agriculture, animal production, energy & transportation sectors)

Decision-makers and others who have an impact in the implementation of the One Health approach (population, industry at large, esp. chemicals sector, education, media, multilateral funding agencies)
