- **Minimum standards for breeding, housing and care of dogs in professional establishments:** housing, care, training, information to buyers on responsible ownership
 - Requirements **include** for commercial imports **from third countries**-
- **Traceability requirements to avoid illegal trade and fraud:**
 - Microchipping and registration in inter-operable databases for dogs and cats (1st marketed animals, 2nd owned ones)
 - Verification system to check online advertisements

-Registration of dogs and cats entering the EU should be done in one of the Member States' databases

Effective Identification and registration (I&R) systems & measures to fight against illegal trade

Key Outcomes

- **Regulation as a starting point:** need of empowering competent authorities, veterinarians, shelters, and breeders with knowledge, digital tools, and strong networks.
- **Cross-border cooperation:** clear communication as essential for effective capacity building. Better border controls– Digitalisation
- **Public awareness & Education**
- **Stronger Penalties & Enforcement**
- **Challenges identified:**
 - Shortage of veterinarians in field and administrative roles
 - Rising numbers of companion animals
 - Limited interoperability between different national database systems

Thank you!

Now it is time for
some reflections...

Пришло время для размышлений...

Let's discuss and identify common elements for dog population management programmes

Divided in 2 groups – 10 min per set of questions

1. Legislation framework:

- Are these aspects covered by the current legislation in your country?
 1. Registration & identification of dogs and breeders
 2. Rabies vaccination + other measures against zoonotic diseases
 3. Dog movement control
 4. List of potentially dangerous dogs.
 5. Dog shelters
 6. Animal welfare obligations for owners and authorities
- Is it applied? Which sanctions and penalties are provided?

2. Free-roaming dogs:

- Are sources identified?
- How is the removal and handling procedure, Trap–neuter–return (TNR), rehoming, euthanasia?

3. Identification and Registration:

- What is the procedure for the identification and registration of dogs in your country: Electronic/paper based, mandatory, linked to rabies vaccination or sterilization campaigns?
