Question 1

- 1. How confident are you that your country's surveillance system would detect a rabies case in your territory (or outside the areas where you normally expect cases) ?**

Scale: Very confident → Not confident

Question 2

Reflecting on your national surveillance system, where do you see the greatest risk of rabies cases going undetected?

Multiple answers possible

- ☐ Wildlife
- ☐ Domestic animals
- ☐ Geographic areas / surveillance effort
- ☐ Sampling strategy (passive/active)
- ☐ Stakeholder reporting
- ☐ Laboratory capacity
- ☐ Importance of awareness campaigns
- ☐ Other: add as a comment

Question 3

Looking ahead, as the epidemiological landscape of rabies in the region continues to evolve, how can the SGE RAB provide the greatest added value to rabies elimination efforts ?

- ☐ Maintaining the current technical focus on wildlife reservoirs, surveillance and ORV
- ☐ Occasional exchange on emerging and re-emerging epidemiological risks involving other rabies reservoirs
- ☐ Including as an area of technical exchange emerging and re-emerging epidemiological risks involving other rabies reservoirs
- Other: add in comments
