Investing in Capacity, Collaboration and Capital for enhanced prevention and control of emerging and re-emerging transboundary animal diseases

Barbara Alessandrini and Rahul Srivastava
Capacity Building Department

32nd Conference of the Regional Commission for Europe
Riga, Latvia, 21-25 September 2026

World Organisation for Animal Health
Organisation mondiale de la santé animale
Organización Mundial de Sanidad Animal

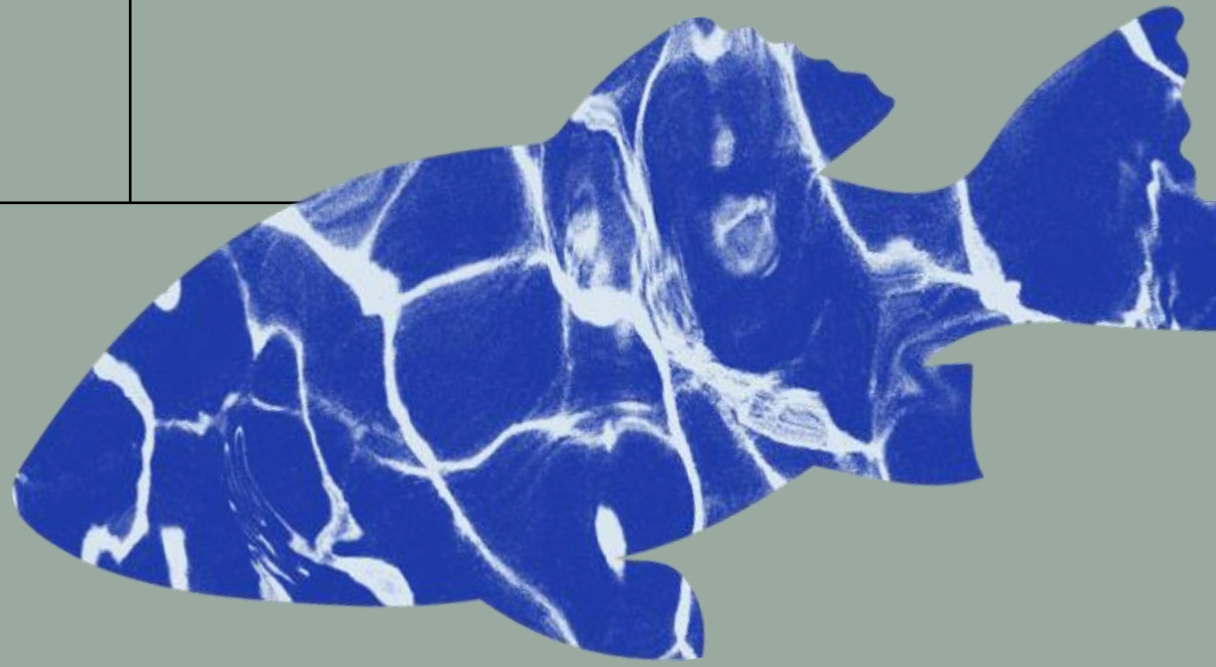

Transformation of the PVS Pathway from a capacity building into a data-driven performance monitoring and improvement programme, driving investment and strategic planning.

World Organisation for Animal Health
Organisation mondiale de la santé animale
Organización Mundial de Sanidad Animal

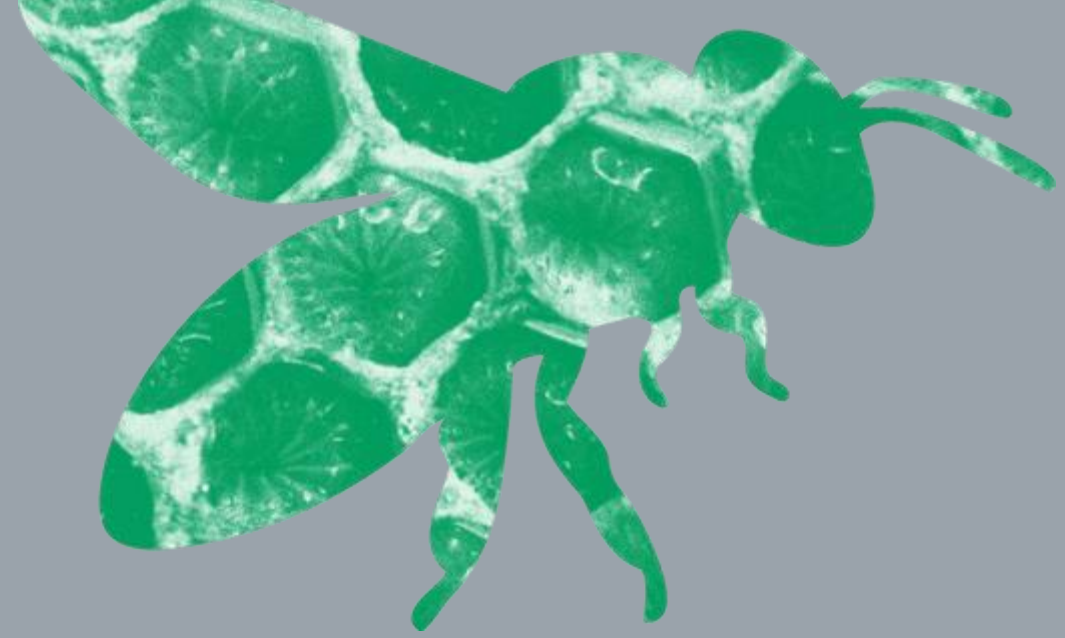

Capacity

Improve long-term performance and resilience

Building knowledge, skills, competencies, systems, and institutional strength to perform effectively and sustainably.

World Organisation for Animal Health
Organisation mondiale de la santé animale
Organización Mundial de Sanidad Animal

Collaboration

Fostering partnerships, networks, and coordinated efforts among individuals, organizations, sectors, or communities. Leverage collective strengths, reduce duplication, and create greater impact than isolated efforts

World Organisation for Animal Health
Organisation mondiale de la santé animale
Organización Mundial de Sanidad Animal

Ensure that sufficient and appropriate resources are available to support long-term success

Capital

Mobilizing and allocating resources to support sustainable growth and impact

- **Financial : grants, loans, equity, philanthropy**
- **Social : relationships and trust**
- **Human : talent and expertise**
- **Physical : assets and infrastructure**

World Organisation for Animal Health | Organisation mondiale de la santé animale | Organización Mundial de Sanidad Animal

8th Strategic Plan

Our Vision:

A world with strong animal health systems,

recognised as critical to tackling global challenges and ensuring a better future for all.

Our Mission: To improve animal health and welfare by developing global standards, strengthening animal health systems and positioning animal health as central to tackling global challenges – through agile and inclusive leadership guided by scientific excellence, good governance & transparency, innovation, solidarity & collaboration.

Strategic Orientation 1

Develop global standards, adaptable and applicable to all Members.

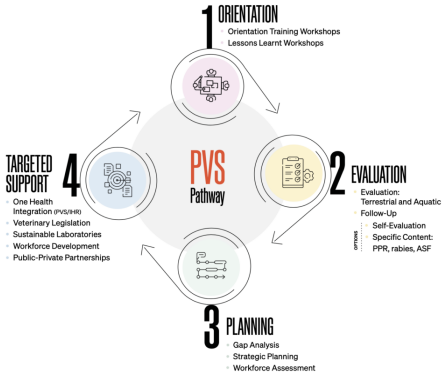

Strategic Orientation 2

Empower Members to build robust animal health and welfare systems and strengthen veterinary public health.

Strategic Orientation 3

Position animal health as central to tackling global challenges.

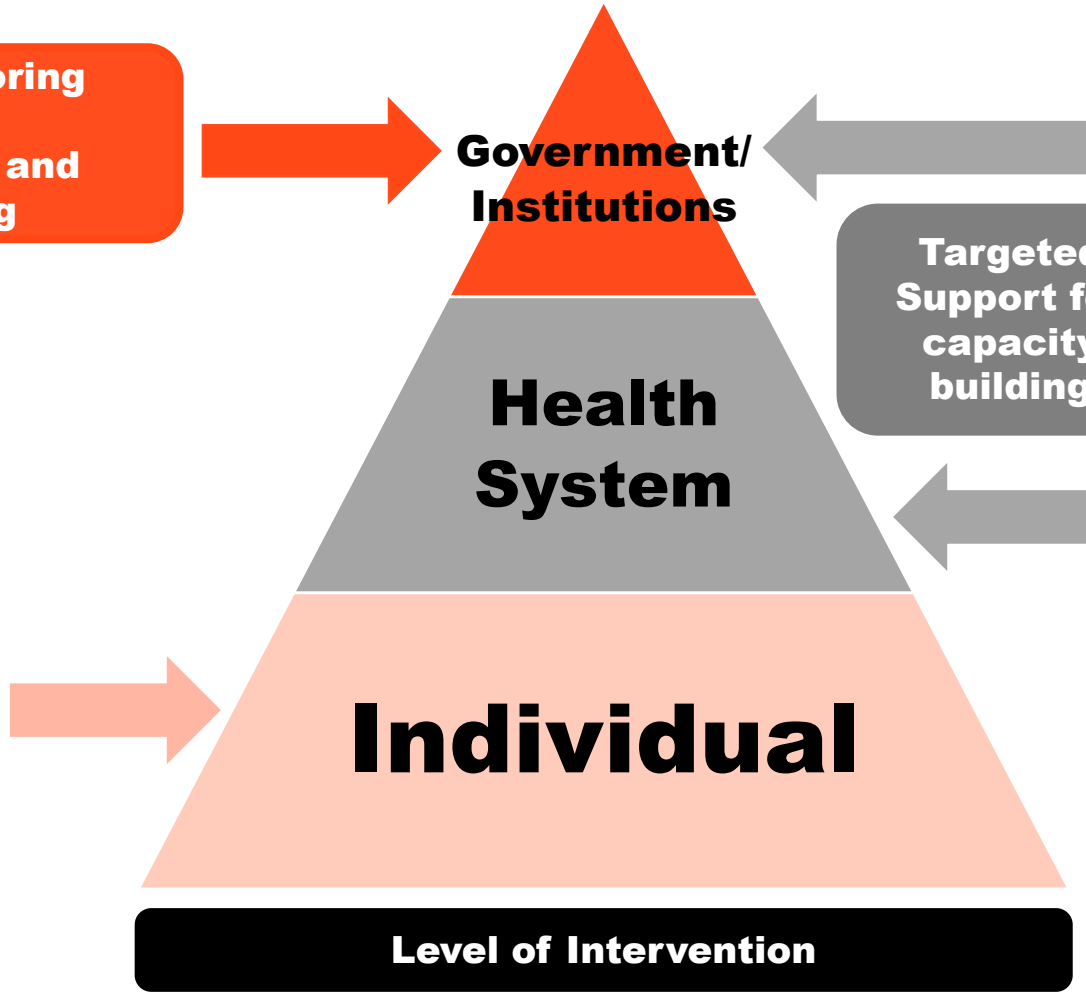

Empowering Veterinary Services: WOAH's Capacity Building Framework

PVS Monitoring Cycle: Evaluation and Planning

The Training System: Learner-centred approach

Targeted Support for capacity building

- Legislation
- Public-Private Partnerships
- Workforce Development
- Sustainable Laboratories
- One Health Integration

WOAH training links Standards, institutional performance and individual competencies

WOAH standards

Codes/ Manuals/ Guidelines

→

PVS Pathway

Section 3 of the Code/ 45 CC)

→

Competency Based Training Framework (CBTF)

Knowledge/ skills/ Competencies

Why competencies matter

Standards create the reference point
Competence turns them into consistent action

Standards

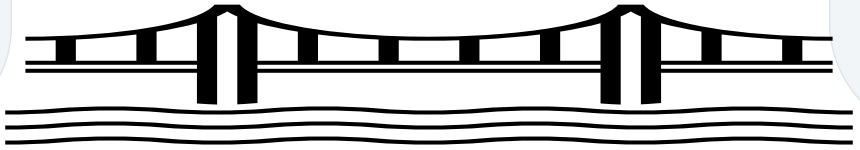

WOAH Codes, Manuals and Guidelines define what good practice looks like.

Workforce

Professionals need the knowledge, skills and competencies to apply those standards.

Veterinary Services

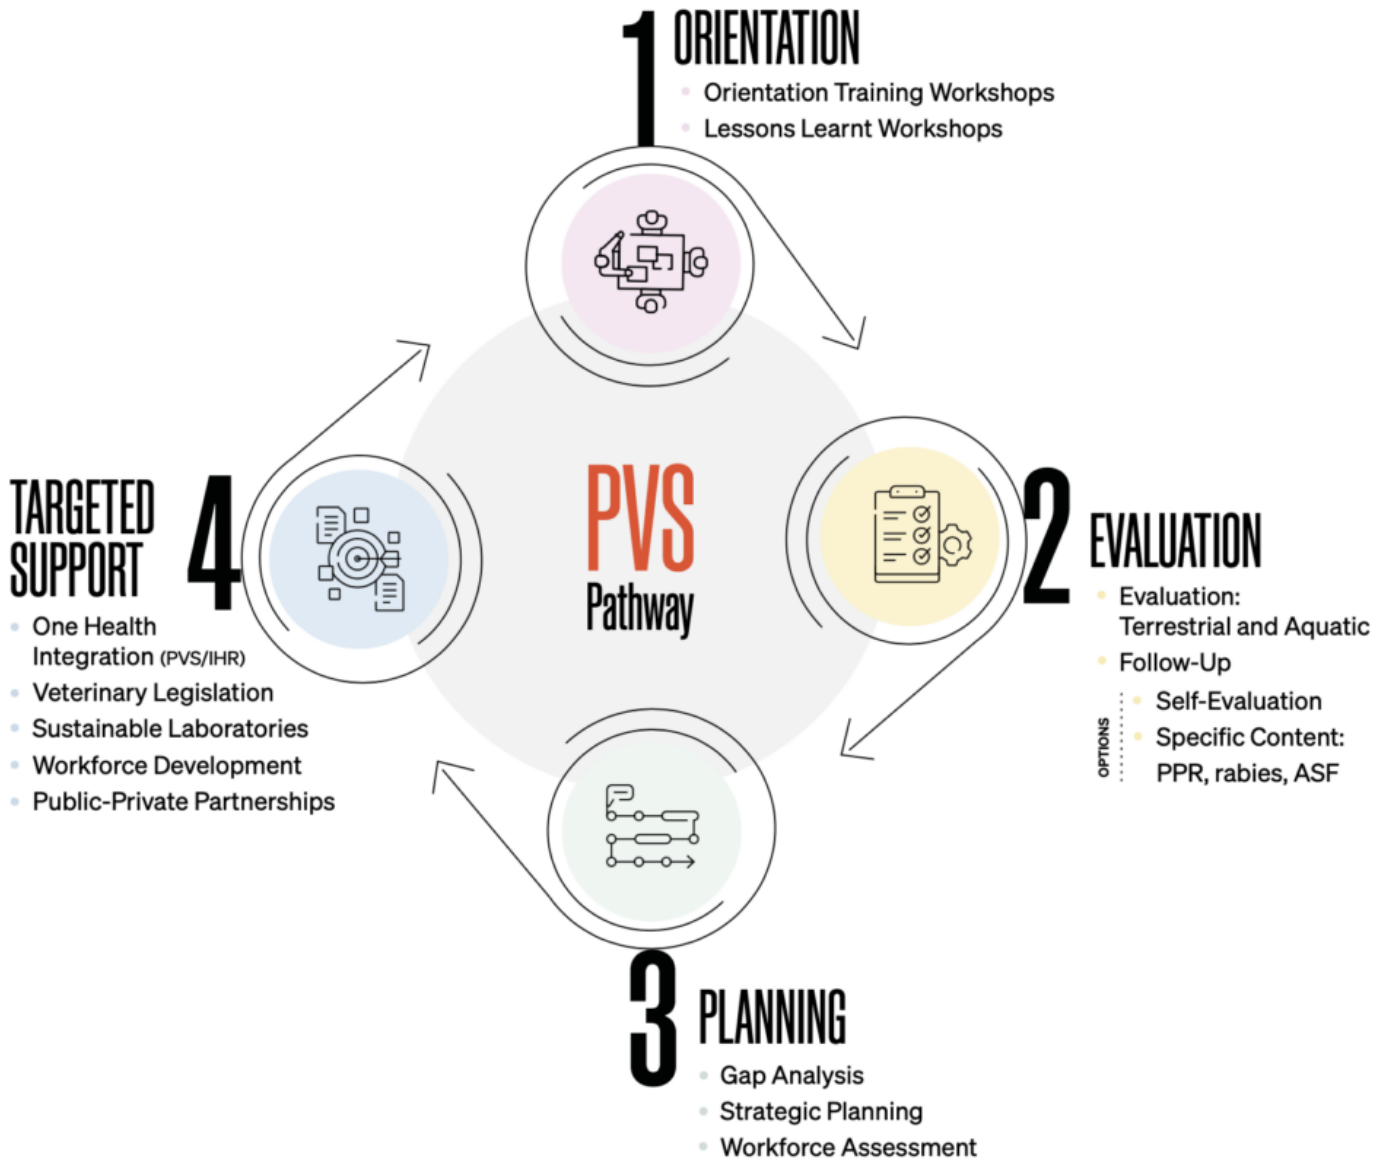

Competent people strengthen disease prevention, preparedness, trade and public health.

Training is the bridge between the system we expect and the performance we achieve

Performance of Veterinary Services (PVS) Pathway

- Comprehensive, multi-staged process for **sustainable planning** and **improvement** of Veterinary Services' (VS) capacities
- Supports greater **compliance** with WOAH International **Standards for** animal health and welfare
- Each step corresponds to specific **capacity-building** activities
- **Voluntary, country driven** process targeting internal systems and resources for sustainability

PVS Pathway Engagement: Europe

What are the benefits of engaging in the PVS Pathway ?

A credible roadmap to stronger, more resilient Veterinary Services

01

DIAGNOSE

Independent view of strengths & weaknesses from deployment of standardized methodology

02

PRIORITISE

Focus resources on what matters most, based on evidence-based recommendations

03

INVEST

Build the case for investment from public and private partners

04

PREPARE

Stronger surveillance, prevention & response, animal health, & livelihoods

05

CONNECT

Support safe trade, One Health & health security

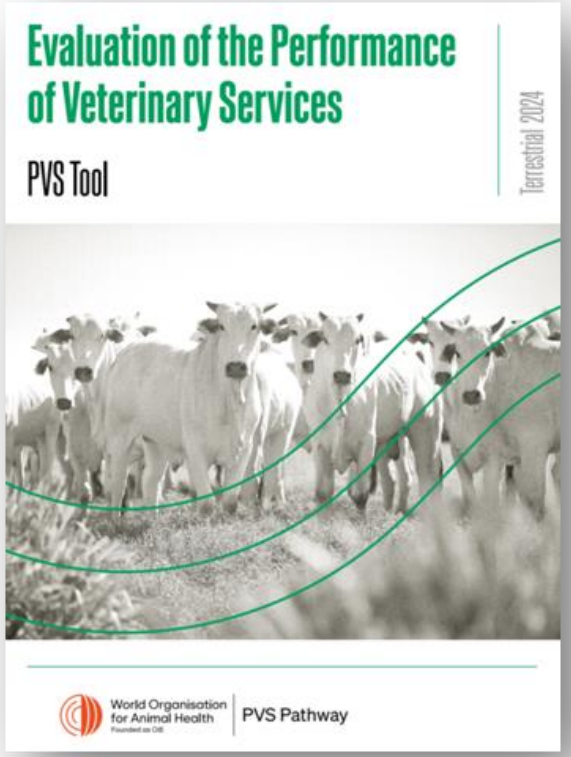

06

MEASURE

Track progress & demonstrate impact, insights based on documentation, observation and evidence

PVS turns assessment into action: IDENTIFY → PRIORITISE → INVEST → STRENGTHEN → MEASURE

PVS Evaluation

Chapter I	Human, physical and financial resources
I-1	PROFESSIONAL AND TECHNICAL STAFFING OF THE VETERINARY SERVICES
I-2	COMPETENCY AND EDUCATION OF VETERINARIANS AND VETERINARY PARAPROFESSIONALS
I-3	CONTINUING EDUCATION
I-4	TECHNICAL INDEPENDENCE
I-5	PLANNING, SUSTAINABILITY AND MANAGEMENT OF POLICIES AND PROGRAMMES
I-6	COORDINATION CAPABILITY OF THE VETERINARY SERVICES
I-7	PHYSICAL RESOURCES AND CAPITAL INVESTMENT
I-8	OPERATIONAL FUNDING
I-9	EMERGENCY FUNDING
Chapter II	Technical authorit
II-1	VETERINARY LABORATOR
II-2	RISK ANALYSIS AND EPID
II-3	QUARANTINE AND BORDE
II-4	SURVEILLANCE AND EARL
II-5	EMERGENCY PREPAREDN
II-6	DISEASE PREVENTION, C
II-7	ANIMAL PRODUCTION FO
II-8	VETERINARY MEDICINES
II-9	ANTIMICROBIAL RESISTA
II-10	RESIDUE TESTING, MONIT
II-11	ANIMAL FEED SAFETY
II-12	IDENTIFICATION, TRACEA
II-13	ANIMAL WELFARE

Chapter III	Interaction with stakeholders
III-1	COMMUNICATION
III-2	CONSULTATION WITH STAKEHOLDERS
III-3	OFFICIAL REPRESENTATION AND INTERNATIONAL COLLABORATION
III-4	ACCREDITATION/AUTHORISATION/DELEGATION
III-5	REGULATION OF THE PROFESSION BY THE VETERINARY STATUTORY BODY
III-6	PARTICIPATION OF PRODUCERS AND OTHER STAKEHOLDERS IN JOINT PROGRAMMES
III-7	VETERINARY CLINICAL SERVICES
Chapter IV	Access to markets
IV-1	VETERINARY LEGISLATION
IV-2	INTERNATIONAL HARMONISATION
IV-3	INTERNATIONAL CERTIFICATION
IV-4	EQUIVALENCE AND OTHER TYPES OF SANITARY AGREEMENTS
IV-5	TRANSPARENCY
IV-6	ZONING
IV-7	COMPARTMENTALISATION

The 45 Critical Competencies

- ✓ ***5 levels of advancement for each Critical Competency***
- ✓ ***Progressive: a higher level assumes compliance with all preceding levels***
- ✓ ***Increasing capacity to comply with WOAH international standards***

If weak/outdated legislation is identified during a PVS mission, what could WOAH offer to help strengthen the legal framework?

If weaknesses in laboratory systems are identified during a PVS mission, what could WOAH offer to strengthen reliable, sustainable and responsive diagnostic capacity?

If gaps in private-sector engagement are identified during a PVS mission, what could WOAH offer to help unlock and structure private-sector capacity?

If gaps in cross-sector collaboration are identified during a PVS mission, what could WOAH offer to strengthen coordination across animal, human and environmental health?

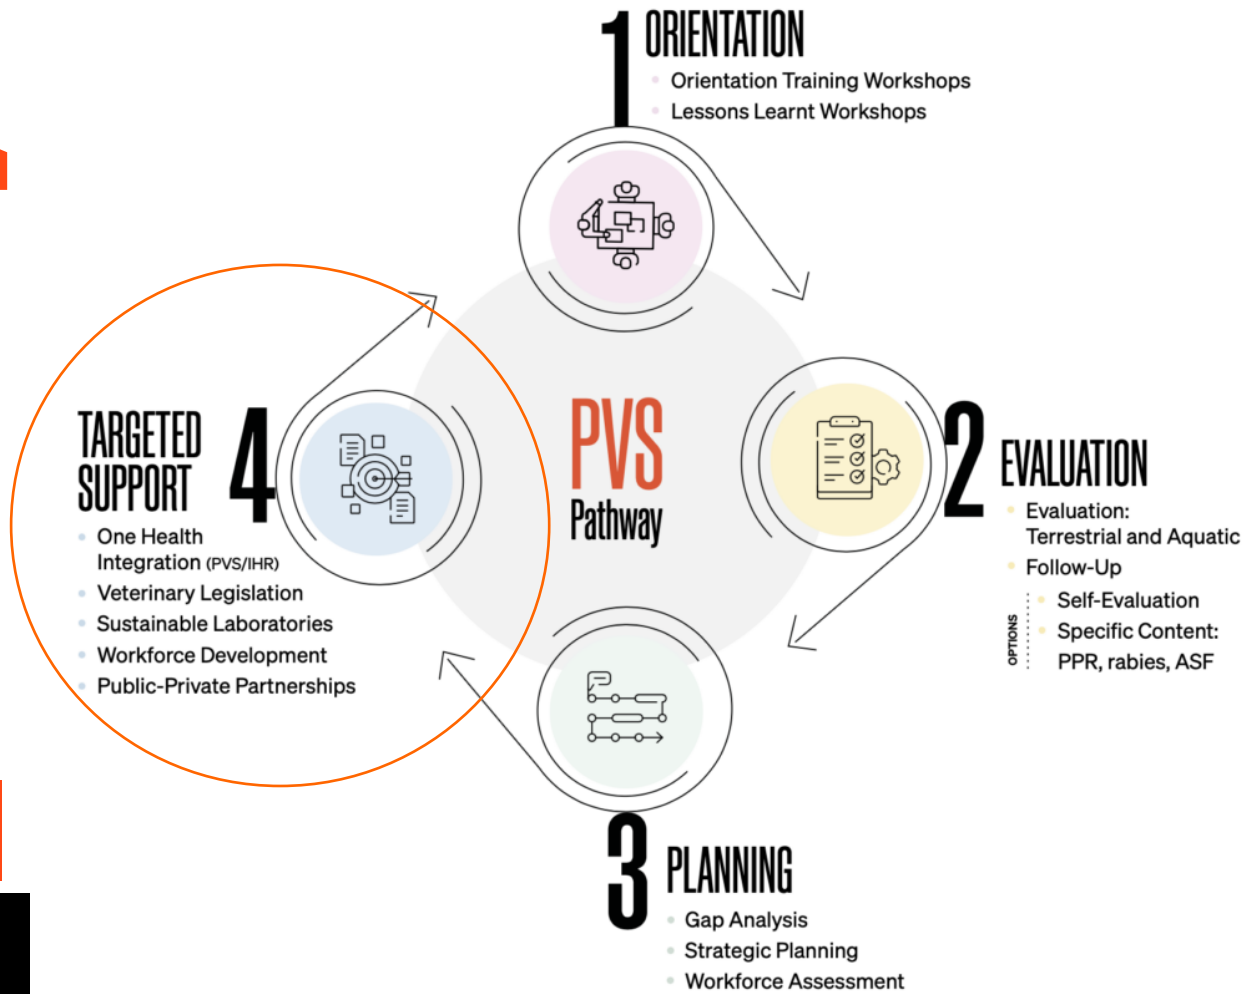

If workforce gaps are identified during a PVS mission, what could WOAH offer to strengthen the people, skills and capacities needed to deliver veterinary services?

Let's learn about what WOAH offers to address these gaps through PVS Targeted Support

Official Use Only

PVS Targeted Support

Thanks to the speaker of the previous session

Session: Harmonisation of biosecurity measures:

Technical Item I: Harmonisation and effectiveness of biosecurity measures for emerging and reemerging transboundary animal diseases (Dr Silvia Bellini, Vice President of the Scientific Commission for Animal Diseases (SCAD)

Members' experience on harmonisation of biosecurity measures to prevent and control emerging and re-emerging transboundary animal diseases – Lessons learned from France and Ireland (Dr Nicolas Ponçon, Representative of Delegate of France; Dr June Fanning, Delegate of Ireland)

Legislation Public-Private Partnership Workforce Training ….

Veterinary Legislation Support Programme (VLSP)

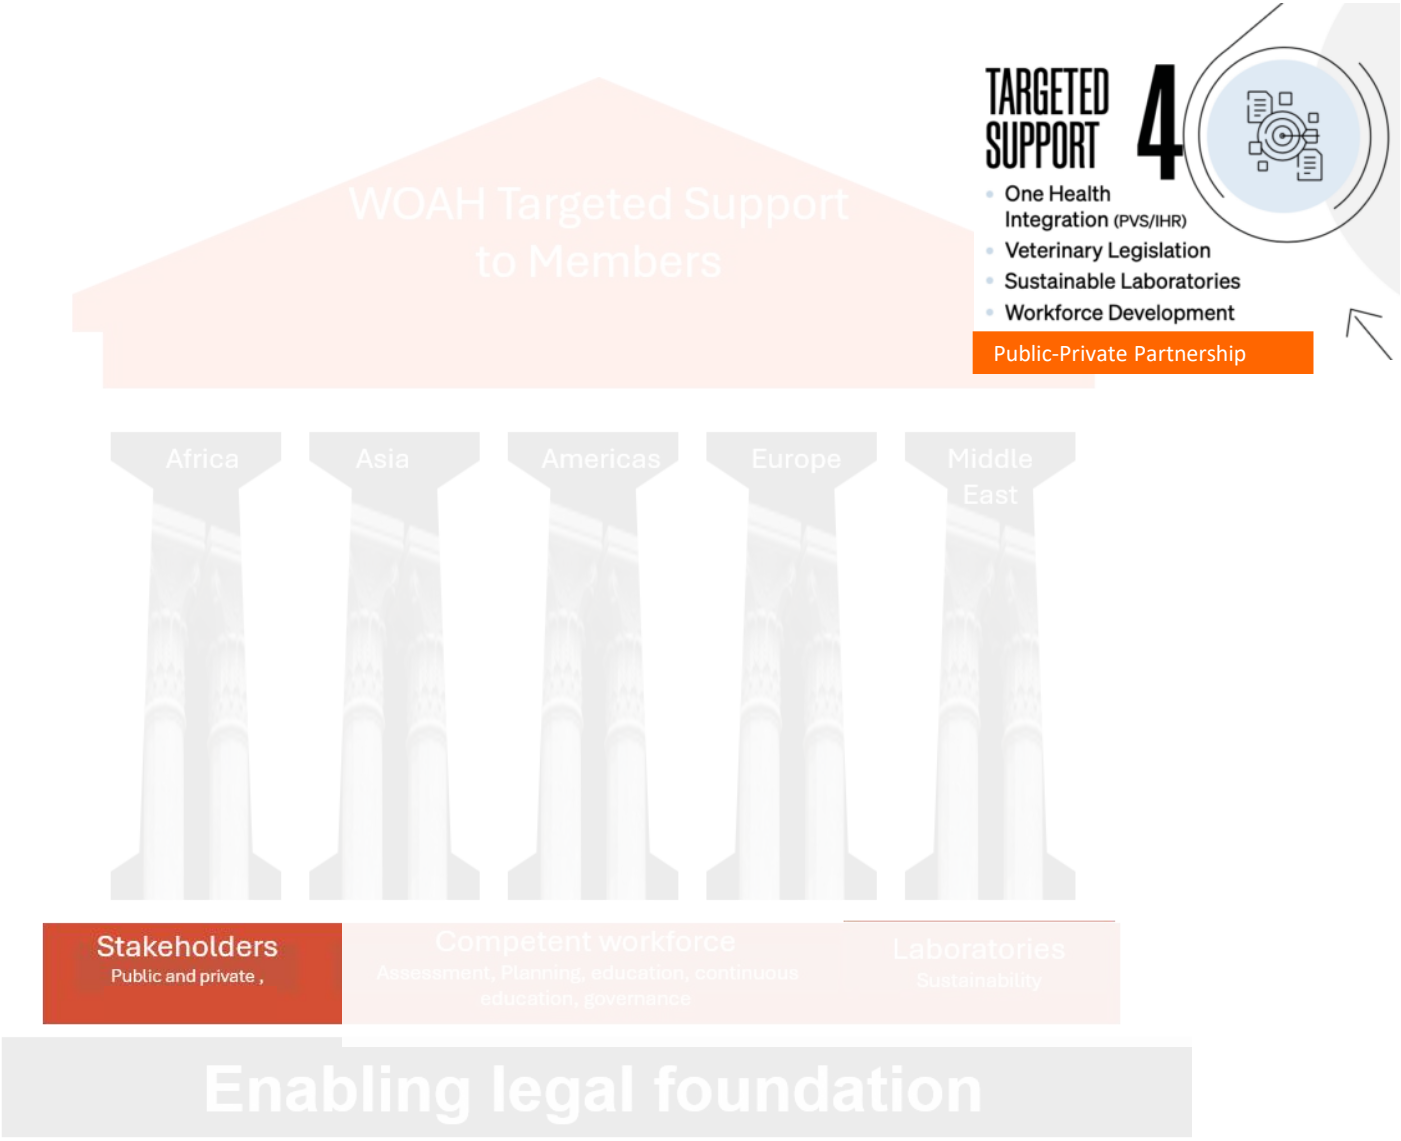

In Europe:

- **5** Members engaged in the VLSP
- **12** VLSP activities

- **Stage 1:** Identification missions = **to identify weaknesses** in national veterinary legislation
- **Stage 2:** Agreements = to assist Members in **revising existing legislation or developing new legislation** (Phase 1: preparation; Phase 2: implementation)
  - ✓ Awareness-raising on the importance of quality legislation
  - ✓ Skills transfer for legal drafting
  - ✓ Collaboration between veterinarians / legal drafters
- Experts: Veterinarians and Lawyers/Jurists
- Optional Tailored Contents:
  - Biological Threat Reduction
  - Antimicrobial Resistance (AMR)
  - Pilot: Wildlife Disease Control
  - Upcoming: Animal Welfare

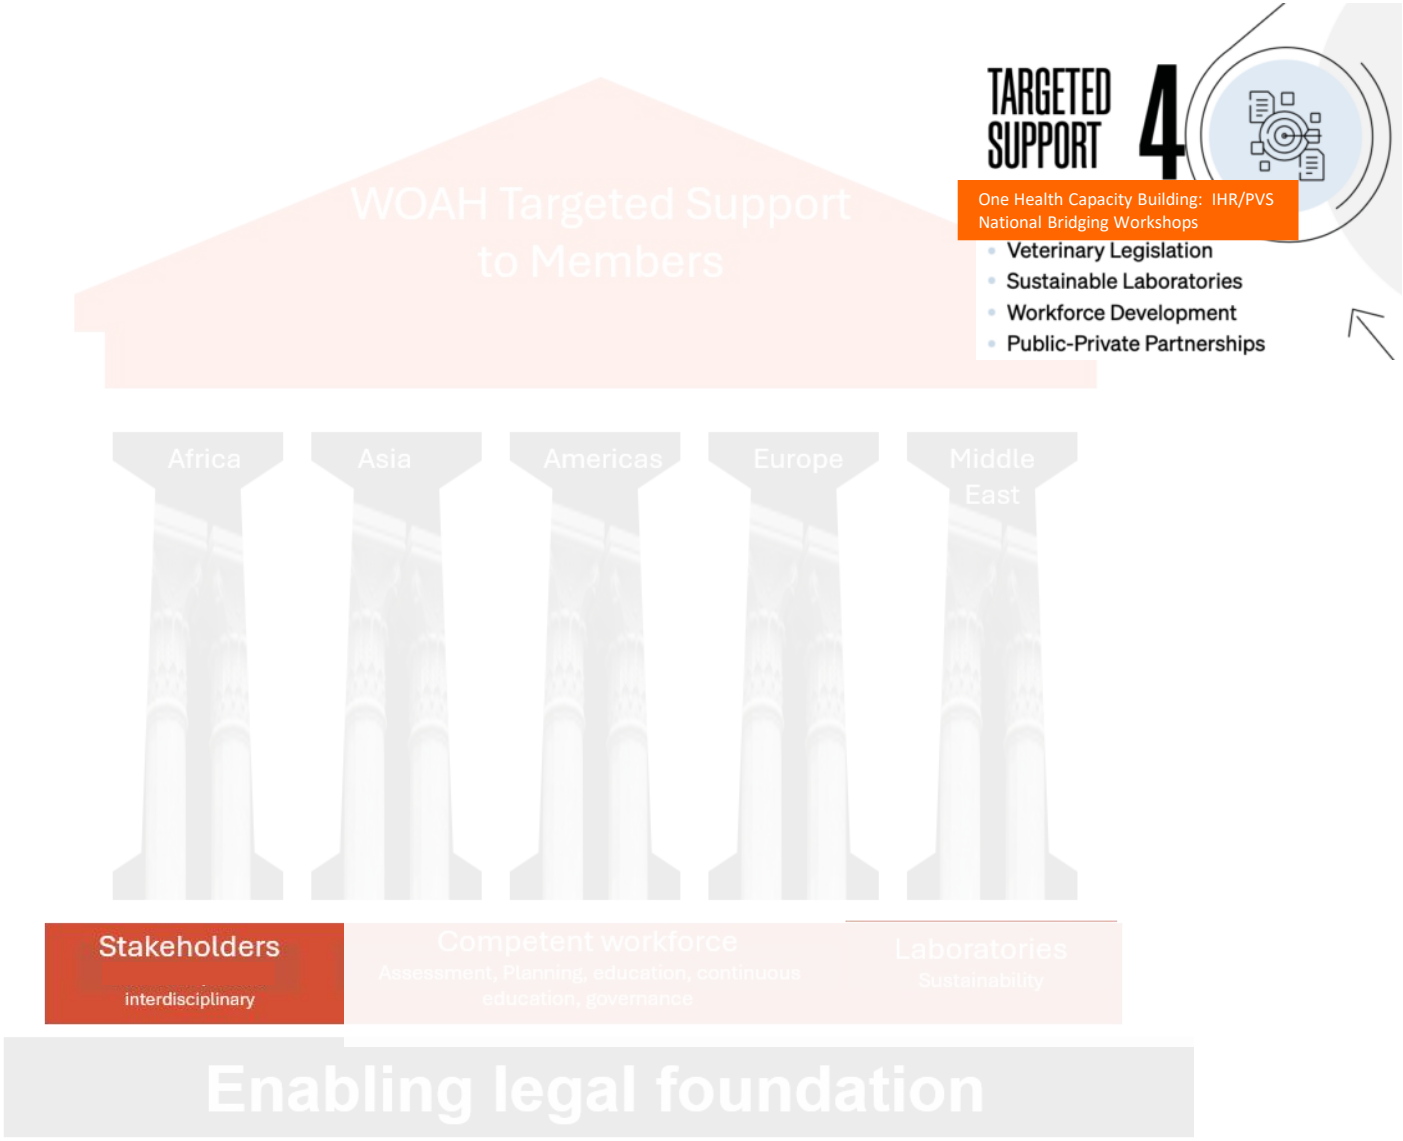

Public-Private Partnership Targeted Support

PPP Targeted Support to strengthen Veterinary Services through effective and efficient private sector engagement

- Flexible methodology to address the Members' needs
  - Terrestrial and aquatic Animal Health
  - Animal Welfare
  - Trade and many more area…
- Three-phase interventions – preparatory phase of 2 months followed by a PPP workshop and report submissions with recommendations
- Supported by various tools (institutional and individual capacity building) and guiding documents
  - PVS IS enabled with WOAH PPP Database
  - WOAH PPP Handbook
  - eLearning modules

One Health Capacity Building: IHR/PVS National Bridging Workshops

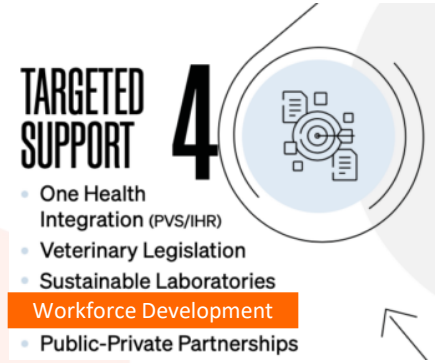

In partnership, WOAH, FAO and WHO conduct interactive IHR-PVS National Bridging Workshops (NBWs) targeting a truly operational One Health approach at the national level.

It brings together national stakeholders and decision makers from the animal health and the human health services from national, regional and local levels, as well as representatives of other relevant sectors (environment, wildlife, media, police, etc.).

Their aim is **to analyse and improve the collaboration between sectors** so that they can better tackle major health security risks at the animal−human-environment interface.

Workforce Development

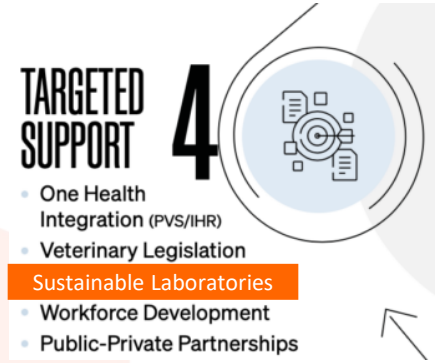

<u>In Europe:</u>

- Veterinary Education Twinning
  - Ukraine and France
  - Uzbekistan and USA
  - Kazakhstan and France
- VPP Curriculum support: Georgia
- National and subregional workforce development workshop
  - Armenia
  - Kazakhstan
  - Romania

WOAH supports its Members in assessing their workforce needs and in establishing appropriate regulatory, educational and training frameworks to prepare and deploy veterinary personnel across public and private sectors.

- <u>Workforce planning and assessment</u> (Regional and sub-regional workshops, National workshops, Veterinary workforce assessment tool (2026)
- <u>Education and continuous education</u> (Competency and curriculum guidelines for Vets, VPPs and CAHWs, VEE Twinning Programme, VPP competency and curriculum assessment and alignment programme)
- <u>Governance</u> (VSB Twinning Programme, VSB support (2026)

Sustainable Laboratories

<u>In Europe:</u>

- Armenia
- Kazakhstan
- Kyrgyzstan
- Uzbekistan

To develop the case for investment in sustainable national veterinary laboratory networks and build Members' ability to advocate for sufficient resources

Objectives

- to evaluate overarching requirements for sustainability
- to maintain operations at a targeted level and achieve business continuity
- to propose strategic recommendations based on current and future demand for laboratory services
- to ensure that the laboratory service needs can be met

Targeted Support to Members

Informed by PVS Evaluation and Gap Analysis, WOAH provides TARGETED SUPPORT to Members in transforming the identified gaps into strategic, high-impact investments

Can you enforce disease control, biosecurity, and safe trade with outdated laws?
The Veterinary Legislation Support Programme legal frameworks for alignment with **international standards** and effective **enforcement**, while addressing **current and future challenges.**

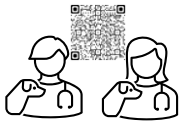

Are you fully leveraging private sector capacity, or leaving value untapped?
Public Private Partnership Targeted support enables structured PPPs to **unlock financing, innovation, and service delivery at scale**.

Are animal, human, and environmental health systems truly working together—or operating in silos?
IHR-PVS National Bridging Workshops align sectors to **prevent pandemics at the source** and strengthen cross-sector governance.

Do you have the right people, skills, and incentives to deliver national animal health goals?
Veterinary Workforce development programmes help countries build **fit-for-purpose human capital across public and private sectors.**

How reliable is your disease detection system when it matters most?
Sustainable Laboratory missions assess and guide investment in **diagnostic capacity, surveillance, and system sustainability**.

Your interest

The CBTF: a map for lifelong learning

A structured way to organise learning around the competencies needed by Veterinary Services

Competency Package Terms of Reference: what are they for?

- Organises learning into Competency Packages
- Connects learning outcomes to WOAH standards and real work
- Supports coherent learning pathways instead of isolated courses
- Helps training providers, institutions and learners plan together

Competency Package Terms of Reference

Topic 1 International Trade Regulatory Framework	Describes the importance of safe trade in animals and animal products, the international legal framework for trade (including the role of WOAH standards), and the legal rights and obligations of trading countries, e.g. they are obliged to participate in WTO processes for the resolution of differences between trading partners.
Topic 2 Animal Health Status, Zoning and Compartmentalisation	Explains the relationship between policies and programmes for the prevention and control of animal diseases and international trade. This topic focuses on the importance for safe trade of disease surveillance, management, reporting (to WOAH) and transparency. It explains the significance of transboundary animal diseases (TADs) for international trade; how to obtain accurate information on animal health status; systems for disease surveillance and reporting to WOAH; the concept of distinct animal health status; and WOAH tools to enhance transparency in relation to animal health status. This Topic does not aim to address animal disease surveillance comprehensively, as this is addressed in a dedicated CP on animal health management.
Topic 3 Import and Export Measures and Controls	Presents the actions of VS / AAHS in relation to the practical implementation of trade policy, from both the import and export perspective. It covers the inspection and control of the movement of animals; WOAH recommendations on the operation of border inspection posts; actions to support compliance with veterinary certification, including harmonisation of national policies and programmes with international standards; and the negotiation of export market access from both the export and import perspective.
Topic 4 Veterinary Certification	Covers WOAH model veterinary certificates and recommendations on the implementation of veterinary certification; interpretation of common certificate conditions; assessment of the capability of VS / AAHS to issue veterinary certificates; the principles supporting effective certification; and the challenges and benefits of implementing electronic sanitary certification.
Topic 5 National Trade Framework	Discusses the national requirements that countries must meet to support safe international trade and considers the role of the veterinary Competent Authority in supporting safe trade. It also covers the development of national official assurance systems and the development of national priorities to inform a strategic trade agenda, which involves consulting with stakeholders in the public and private domain.
Topic 6 Management of Trade Non-Compliance	Identifies types of non-compliance and approaches to prevention and control, as well as administrative and criminal sanctions for non-compliance. Note: WTO mechanisms for resolving trade differences, including the raising of Specific Trade Concerns in the SPS Committee and the dispute settlement process are addressed in Topic 1.

Modules		Learning Outcomes
TOPIC 2. ANIMAL HEALTH STATUS, ZONING AND COMPARTMENTALISATION		
DAY 1		
Principles of animal health status, zoning and compartmentalisation	K	• Explain the implications of TADs and zoonoses for trade. • Describe disease • Explain concepts statuses. • Identify WOAH to status).
	S	• Locate and asses
DAY 2		
Definition and demonstration of disease freedom (country, zone, compartment)	K	• Explain how the V support the nego
	S	• Explain to stakeh the animal health safe trade. • Prepare documer zone or compartn
EXPERT		
No e-Learning modules. These competencies would be gained via work experience or blended training programmes/ workshops	C	• Obtain a distinct • Plan and impleme the animal health • Lead the process lead the problem- maintaining that
TOPIC 3. IMPORT AND EXPORT MEASUR		
DAY 1		
An introduction to import and export measures and controls	K	• Describe the over products. • Identify WOAH ar posts and the insp • Outline the proce international stan • Identify the risk fa of animals and th vaccination, and
Foundations of import risk analysis in international trade	K	• Define the role of • Describe hazard i the context of inte • Identify WOAH re defensible risk an

Modules		Learning Outcomes
TOPIC 1. INTERNATIONAL TRADE REGULATORY FRAMEWORK		
DAY 1		
Introduction to international trade in animals and animal products	K	• Understand the importance of safe trade of animals and animal products in accordance with the international regulatory framework. • Understand and define the overall process for engaging in international trade of live animals and animal products, i.e., before, during and after import or export of animals and animal products.
	S	• Understand the roles and responsibilities of the importing country and describe the activities to be conducted before, during and after importation of animals and animal products. • Understand the roles and responsibilities of the exporting country and describe the activities to be conducted before, during and after exporting animals and animal products. • Identify the enabling factors to build trust between importing and exporting countries throughout the whole trade process.
DAY 2 **Pre-requisite: WTO eModules on the WTO Agreements**		
Application of the international trade regulatory framework	K	• Explain the role of WOAH international standards in the context of the SPS Agreement, including the key principles of risk assessment, harmonisation, regionalisation (zoning, compartmentalisation), equivalence and transparency. • Describe the rights and obligations of importing and exporting countries in the context of the WTO SPS Agreement and WOAH standards.
	S	• Explain the International Trade Regulatory Framework, with a focus on the WTO SPS Agreement and WOAH standards. • Name the key principles in the WTO SPS Agreement that are relevant to the role of the VS / AAHS in the development and implementation of sanitary measures for international trade in animals and animal products.
EXPERT **Pre-requisite: WTO training on the dispute settlement framework**		
No e-Learning modules. These competencies would be gained via work experience or blended training programmes/ workshops	C	• Represent the national VS in the WOAH standard-setting process. • Provide technical expertise to other government agencies to support the resolution of trade differences through the WTO SPS Committee (Specific Trade Concerns) and the formal dispute settlement process.

The learning outcomes include knowledge (K), skills (S) and competencies (C)

What are WOAH eModules?

Online modules designed to make standards practical, accessible and scalable.

Self-paced

Use independently, at a time and pace that fits the learner.

Blended

Combine online learning with workshops, coaching or field practice.

National plans

Integrate modules into institutional or national Veterinary Services training.

Interactive and Engaging

- Videos
- Podcasts
- Case studies
- Quizzes
- Final assessment

The format is flexible; the purpose is application.

African swine fever in wild boars, biosecurity management and practice

This eModule has been developed thanks to the financial support of the European Union and the Republic of Italy

Co-funded by the European Union

This module was developed in collaboration with Opera Srl and Teleskill Italia Srl who supported its development, design and production

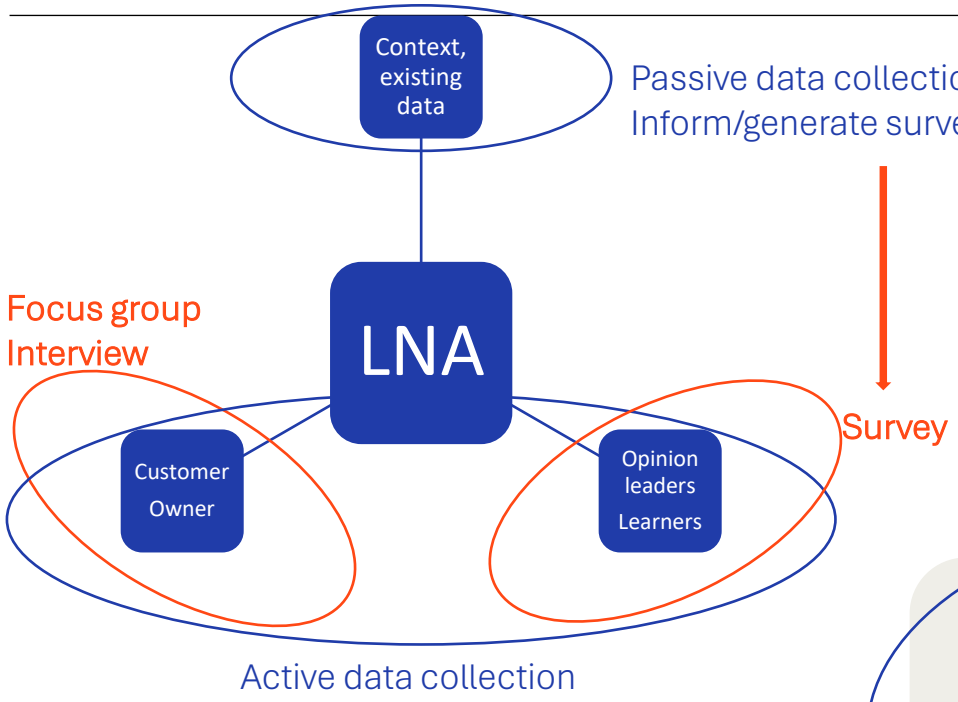

OPERA

Teleskill
Innovating with passion

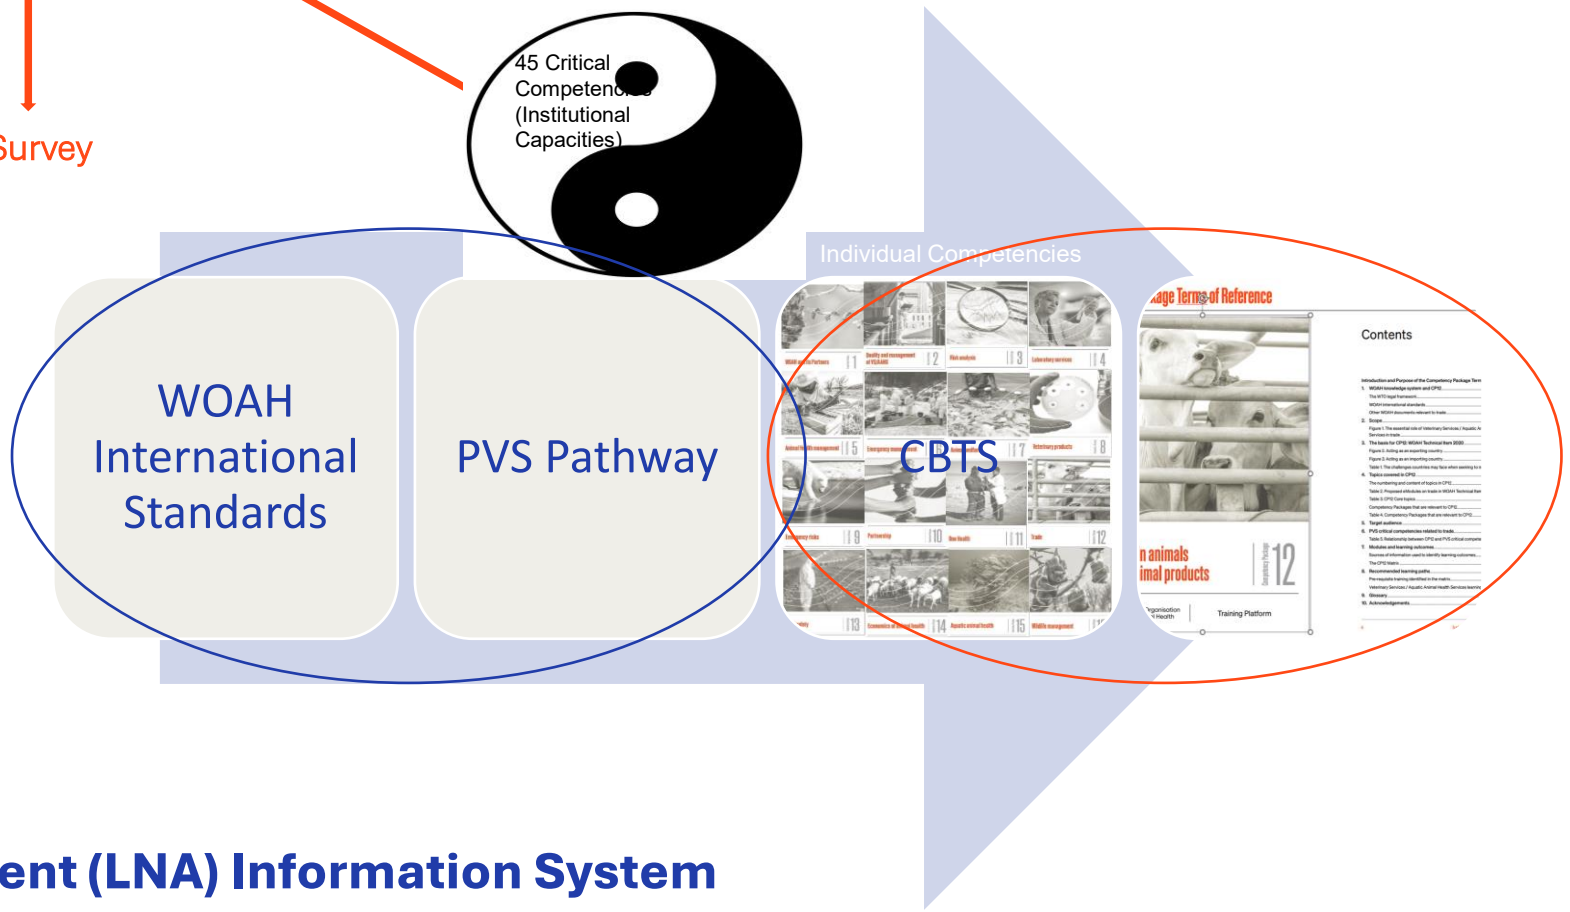

We extend our gratitude to WOAH peer review team for their invaluable expertise and contributions to ensuring the quality of this module:

- Charmaine Chng, Science Department
- Alexandre Fediaevsky, Preparedness and Resilience Department
- Jean Perchet, Regional Representation for Europe (former)
- Paolo Tizzani, Data Integration Department

LNA methodology and leveraging the PVSIS

SIMULATION OF LEARNING NEED ASSESSMENT SURVEY FOCUSED ON PREVENTION AND CONTROL

WOAH CAPACITY BUILDING SYSTEM

- Embedded in 8° Strategic Plan
- Connects institutions and individuals, contributes to generate trust and engage stakeholders
- Focused on customised solutions for Members' needs
- Provide data in support of global frameworks, strategies, programmes
- Data and evidence based, works as MEL framework and offers targeted support to strengthen competencies and performance
- Develops indicators that generate essential data and information for strategic planning and resource mobilisation

PVS evaluation → shared evidence → targeted capacity building → stronger Veterinary Services
